Subject: Dog Team Meeting 2/23/23

Good Afternoon,

Since those who don't agree with some of the decisions that SCRAPS management makes in regard to the dogs in our care, and then are terminated or asked to leave meetings when they disagree, I am requesting that you share with the rest of the team what individuals you met with and for what purpose. There is no reason not to provide this information to the rest of the team. Your refusal to share this just comes across as deceitful in nature. The animal shelter world is a small community and SCRAPS leadership is quickly developing a very negative image.

I am all for getting other opinions when assessing dogs. More information helps everybody. When it is done in secret, it comes across as underhanded and nontransparent.
