EasyRounds™

Designed for Physicians by Physicians

Opportunity
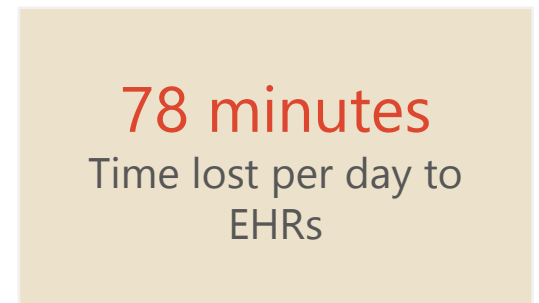

In spite of MU2 requirements, physicians are not happy with their EHRs

Most physicians spend over 4 hours each day on documentation

Physician – Patient interaction is negatively impacted

HITECH Act and the MU initiatives have not improved interoperability

400,000
Preventable deaths at US hospitals each year

59.4%
Physicians lost time moving to an EHR

78 minutes
Time lost per day to EHRs

* 2013 Study in JAMA Online

Timely access to a complete view of patient chart is crucial in the delivery of care. However:

- Care providers do not have access to the entire chart at the point of care

- Data is scattered across dozens of systems at hospitals – and in many cases in siloes.

- Too much time spent in tracking down referring physicians

- Existing communications tools and processes are manual, inefficient and labor intensive

Solution

EasyRounds is a powerful charting solution that provides unprecedented access to patient information, aides in Clinical Decision Support and leverages the existing EHRs

- Progress Notes (including history) can be accessed via an iPad mini

- HIPAA compliant secured SMS with ability to save to the patient record

- Seamless integration with legacy CPOE systems

- Automated alerts on updates to patient record

Dashboard, Beacons, Alerts

- See your latest performance measures

- View administrative notifications and alerts

- Quick view of updates to patient records

- Access your latest messages at a glance

Patient List

- Access all patient records that you are visiting today

- Search all patients

- Get location information of each patient

- See how long each patient has been admitted

- Compare against acceptable DoS measures

systems**merge**

Features

Secure SMS

- Securely collaborate with the care team and other providers

- Track messages by patient

- Save messages to the patient chart

Patient Label

- See pertinent patient details including photo

- Add patients photo to record – promoting patient safety

MESSAGE CENTER

Steven Manoukian - Cortez Cruz	Proceedure for Mr. Cruz succesful. He needs	
Donald Crumbo - Feedback	Hi Chris, I would like your feedback on Hudson	
Gregory Bashian - Tom Bosley	Chris, The procedure had to be repeated on	
Robert Wheatly - Tom Bosley	Gentlemen, I would like to meet and discuss Mr. Bosley case.	!
Gregory Bashian - Tom Bosley	I am available tomorrow at 2:00 pm
