

# EasyRounds®

Designed for Physicians by  
Physicians

EasyRounds® is a Patient's Chart and Physicians documentation tool designed to work with existing EHR's to substantially improve the physician's workflow. Access up to the minute patient data in a comprehensive, intuitive format, greatly improving patient—physician interaction. Now care providers can collaborate with others from anywhere using EasyRounds® on their mobile device.

## Key Features

### Dashboard, Beacons, Alerts

The Physicians Dashboard provides a clear, consolidated, actionable view of information across various EasyRounds® modules. See your latest performance measures, administrative notifications and alerts, and updates to patient records.

### Progress Notes

Access all progress notes with a swipe. You can view by specialty, physicians favorites, smart search and most used terms allowing rapid document creation.

### Family and Social History

Document relevant data points based upon visit, One touch access to Family and Social History with color coded positives that grab attention.

### Patient Listings

Search and access all patients in your care, get immediate location information of each patient and see how long they have been admitted (DOS measures).

### Radiology, Lab Results, Telemetry

Retina display clarity of studies, annotate as you normally would, PACS interface capable.

### CPOE

Rapid Order Entry enabled by Order Sets, favorites and frequently used orders.

---

Designed by physicians, EasyRounds® professes to substantially improve physician usability and adoption. By overlaying the EasyRounds® interface on top of the existing EHR systems, hospitals save money and are poised to make a disruptive change to the way physicians and care providers use technology in providing care.
