

CITY CONCEPT'S SPACE OF THE MONTH

This exquisite & harmonious workspace at Kent House has been tailored for modern success

KENT HOUSE, GREAT
TITCHFIELD ST,
LONDON, W1W 8AJ

CITY CONCEPTS AND MORGAN LOVELL TRANSFORM KENT HOUSE INTO A VISUALLY STUNNING WORKSPACE

City Concepts, the leading commercial glazing company in London, is pleased to announce its latest project in collaboration with Morgan Lovell. The project involved the complete renovation of Kent House located at Great Titchfield Street, London. It spans over 16,000 square feet across four levels. The project took approximately 10 weeks to complete from start to finish.

City Concepts and Morgan Lovell embarked on an ambitious project to revolutionise the traditional office space. The goal was to design an environment that seamlessly blends form and function while fostering productivity, innovation, and happiness among employees. By breaking away from the mundane white office aesthetic and embracing a captivating and minimalist design, they successfully crafted an exquisite and harmonious workspace tailored for modern success.

Experience a serene haven of sophistication as you step into this newly transformed office space. The beautifully balanced soft-toned walls create a calming and comfortable environment, while the addition of elegant wooden doors exudes warmth and invites you in.

REVOLUTIONISING OFFICE SPACES: CITY CONCEPTS AND MORGAN LOVELL REDEFINE TRADITIONAL WORKPLACES WITH INNOVATIVE DESIGN

At City Concepts, we are committed to pushing beyond the conventional design and transforming spaces into stunning and visually captivating environments. That is why we were entrusted by industry leaders Morgan Lovell to install our innovative Concept 54 Glazing System across four expansive floors...

Our team of experts worked tirelessly to deliver a stunning array of glazed partitions and door sets, featuring bespoke T-Bar horizontal and vertical banding, impeccably tailored to complement Morgan Lovell's visionary project. The installation process took an impressive 2-3 weeks per floor, highlighting our dedication to efficiency and finesse thanks to the capability of our in-house manufacturing and production team.

The Concept 54 Glazing System installed by City Concepts is renowned for its exceptional acoustic performance, with the 40dB acoustic glass that has been installed. The significance of a peaceful and conducive acoustic environment within the office cannot be overemphasised, and this installation goes a long way in ensuring that this is achieved.

Furthermore, the custom-designed tech panels, are intricately woven into every aspect of the workspace for a flawless, high-performance environment that enhances productivity and efficiency.

The installation of RS44 walnut timber doors by City Concepts adds an elegant and sophisticated touch to the office space. The doors perfectly complement the black edging strips within the F3 aluminium frames, resulting in a harmonious contrast that is visually appealing.

To further enhance the aesthetic appeal of the space, contemporary ironmongery finished in RAL 9005 was used to match the framework colour, creating a cohesive and sleek finish. With the addition of glass manifestations, the overall look and feel of the office space are elevated to new heights, bringing a unique touch of creativity and customisation for the client. The team at City Concepts were delighted to have collaborated on this project, which unfolded flawlessly and without any significant issues. Our project manager Matt Kelly, worked tirelessly alongside the site teams to ensure an unparalleled level of cooperation, resulting in a phenomenal office environment that left all parties impressed.

Partnering with Morgan Lovell on the Kent House transformation was a real privilege for City Concepts. This project is a testament to our unwavering commitment to surpassing client expectations and delivering unmatched service and quality in all of our projects for our esteemed clientele.
