

CITY CONCEPT'S SPACE OF THE MONTH

A complete rethink on traditional office space with a bright and inviting office.

WHITE LION STREET,
ANGEL, LONDON,
N1 9PP

ELEGANT OFFICE DESIGN COMBINED WITH
CONCEPT 25 AND 54 IN ANGEL, LONDON.

PROJECT SIZE: 8,000 SQ FT2

This month's highlighted space from City Concepts features this elegant 8000 sq ft office design. With its clean lines and modern furniture, this is the perfect place to get down to business!

But it's not all work and no play – the large glazing office partitions allow for plenty of natural light, making it a bright and inviting space for all. In today's business world, more and more companies are looking for ways to stand out from the competition. One way that companies are doing this is by rethinking the traditional office space. The result in this instance is a completely inverted work environment without room for the traditional office floor. For instance, visitors get to peek behind the scenes on entry.

The traditional cubicle office for everyone is no longer conducive to a productive work environment, and employers are increasingly looking for ways to boost morale and increase efficiency.

IN COLLABORATION WITH WHITEPAPER, WE SET OUT TO CREATE A MIXTURE OF BREAKOUT SPACES, PRIVATE MEETING ROOMS, COLLAB SPACES AND SINGULAR PODS.

One such way is to design the office around the lifestyle of its employees which has been executed perfectly in this office fit out with a combination of various working environments.

In collaboration with Whitepaper, we set out to create a mixture of breakout spaces, private meeting rooms, collab spaces and singular pods.

With the use of Concept 25 our single-glazing system and Concept 54, our double-glazing system, we were able to provide outstanding acoustic ratings whilst also providing a sense of privacy with the horizontal and vertical banding on the glazing for the spaces that required a little more visual discretion.

The use of City Concept's 25 and 54 systems is intended to reflect the diverse nature of this company's clientele. It was vitally important to get the marriage of rich materials with bespoke design elements on the concept systems to convey the same high-end to that of the client.

By using earthy tones and neutral hues, the fit out aimed to showcase a complete sense of functionality as well as serenity.

The glazing systems offer clean lines throughout the office and feature a silk grey finish (RAL 7006), thus providing a stylish and modern space that complement the odd pop of cobalt and sea green perfectly.

All areas of this space were designed to allow for receiving high profile clients in a private yet luxurious setting. From the entrance reception the visitor is immediately greeted with an inviting and bright environment. Everything from the luxurious, albeit discreet ironmongery on the Concept Systems to the warm floor finishes, everything has been carefully chosen to match and to offer contrast to the normal harsh, and cold commercial environments that have come to be expected within the real estate sector.

Our Concepts systems have allowed the perfect balance for employees to remain productive and relaxed in this fantastic office fitout that is sure to please not only those that work within it, but for the clients who are paying a visit too.
