

ER Nurse Cums

(By: NixPixer EAGER BEAVER)

I had to go into the hospital recently for some minor surgery on my right knee (a motorcycle accident a few years ago). I arrived after dinner and received instructions from my doctor to try to stay up late, because they were going to sedate me rather heavily the next morning for the surgery and the less sleep I had gotten the less drugging they would have to do. I stayed up late watching TV.

I was in a semi-private room that was private now because the other lady was having her surgery that night. It was rather boring. I found some entertainment by fingering myself during the 11 o'clock news. After that I read a book for a while. Just after midnight, the graveyard shift came on duty and Joann walked into my room. Joann was the nurse on duty at my end of the floor. She came over and began the usual temperature, pulse and blood pressure routine. When she went to record them, she read on my chart that my doctor (probably on my husband's request) had ordered rectal temperature readings be recorded every 4 hours. Since I had arrived after 8 PM, this was my first recording. Joann said she would have to get another thermometer. The idea of this stranger sliding something (anything) into my ass began to get my cunt very wet again.

Underneath the covers, I had pulled up my hospital gown to play with myself earlier. I did not pull it down while Joann went to get the other thermometer. When she came back, she pulled the covers down and saw my hairless cunt. She smiled and said she had shaved a few pussies in the hospital but had never had one come in shaved. She had me roll on my side. She pulled at my top asscheek and slipped a greased thermometer into my asshole. I wiggled a bit as she slipped it in. I asked her if she had ever had her cunt shaved. She laughed and told me that back in nursing school, they all received a shaving from other nurses as part of their training and they got a chance to shave others (girls and guys).

Joann asked me when did I get my pussy shaved. I told her that my sorority sisters shaved me for my initiation and had kept me smooth for three and a half years. Joann laughed, she said she only stayed shaved for that one semester. She laughed a lot about sexy things. She pulled the thermometer out of my tail and recorded my temperature. She asked me why did I still shave. I told her that my husband and girlfriend like licking a hairless cunt. She smiled very broadly at the girlfriend part and said she would check in on me later.

About an hour later, I had my eyes closed, my left hand pinching my right nipple and my right hand rubbing my clittie to orgasm. All of a sudden, the blanket flew off and I startled, looked up and saw Joann smiling at my exhibition. I began to close my legs, and she told me to finish. She had waited a few minutes longer than she wanted to,

but she wanted to catch me in the midst of fingering myself. And she wanted to see me finish.

I spread my legs again and resumed my finger action. Joann watched my cunt for a little bit and then walked around the bed, never taking her eyes off my crotch. When she got to my right side, she pulled my gown up high enough to expose my tiny titties. She moved my left hand down to my cunt. I used my left hand to rub my clittie while I pumped my right middle finger deep into my slick cunt hole. Joann stepped back and watched as I worked myself up to a frenzy of finger action and came with a sweaty thrashing orgasm. As I lay back to recover, Joann came close, reached behind me, untied my gown and pulled it from me. She left me laying there, stark naked.

Joann came back with a pan of warm water and began to give me a soft comfortable sponge bath. She washed my face and then my neck and then my shoulders. She asked me if I wanted anything. I told her I wanted to hear about her first shave and about why she wanted to see me fingering myself. Joann rinsed the cloth and began to wash my titties. She took a deep breath and told me about her and Karen.

Back in nursing school, all of the students needed to learn how to shave a patient. Male students at the school served as practice for facial shaves and a few were used to practice shaving other parts. But for shaving female genitalia, only fellow students were used. They all had to submit to be shaved by the instructor or a fellow student. Joann and a girl named Karen were scheduled together about halfway thru the semester. That morning, the head nurse had Joann and Karen change into exam gowns. Joann came out of the bathroom first and was directed to get up on the exam table.

The head nurse (from now on just Head Nurse) positioned Joann's legs into the stirrups and moved her gown up to expose her brown fur. When Karen came out, dressed in just the exam gown, Head Nurse picked out two of the girls to shave Joann. They took turns washing and lathering Joann. They were each instructed to shave half of Joann's pubic region. Joann just shut her eyes, while four female hands manipulated her crotch and removed all her pubic hair. When they were finished, Joann was as smooth and clean as a little girl. She got down and Head Nurse had her help get Karen into position. When Head Nurse pulled up Karen's gown, she exposed the hairiest red cunt and ass that any of them had ever seen. (Karen was a short slightly pudgy redhead) Head Nurse examined her a bit and then announced to the class that she would do the shaving to demonstrate how to shave such a hairy bush and how to shave a girl's ass. Joann said Karen looked a bit terrified but did not protest.

Head Nurse got out a pair of electric clippers (no one else had had so much pubic hair to require clippers) and proceeded to clip Karen's bush. Then Head Nurse washed and lathered Karen's stubble before removing it with the razor. When Karen had no more hair covering her cunt, Head Nurse helped her get down and she moved the stirrups and had Karen step up and bend over the exam table. Head Nurse began lecturing

about how to shave a person's buttocks. She demonstrated how to pull a cheek open to get at all the hair. She washed and lathered Karen's pudgy ass crack. Then she told Joann and another girl to hold Karen's cheeks open so that everyone could see. When Head Nurse was finished cleaning Karen's tail, Joann saw Karen blushing all the way to the bathroom. That weekend, Joann had gone to a party and decided to take a shower before going to sleep. When she entered the dorm's communal bathroom, she heard some moaning coming from the shower stalls.

She went in quietly and searched for the source of the moaning. She pulled aside the curtain of the suspect stall and saw Karen leaning against the back wall, legs spread wide with one hand pumping at her hairless cunt. Joann was very apologetic and quickly closed the curtain. Joann went to the furthest stall to take her own shower. She was wet and soapy when her curtain was opened and Karen stepped in. She took the soap and began washing Joann's back. Joann did not know what to do, so she just let Karen do what she wanted to. Karen turned Joann around under the shower to rinse off the soap. She pushed Joann against the wall and slowly dropped to her knees. Gentle kisses on her hairless mound encouraged Joann to spread her legs and allow Karen more access. Karen slowly probed Joann's slit with her tongue. She probed in and out rubbing against Joann's clit. Joann's passion was usually well under control. She very rarely needed to masturbate to relieve her sexual needs. But now, even a girl's tongue (a girl that she barely knew) was getting to her. Her passions were building and she realized she could enjoy this. Joann spread her legs wide and bent her knees a bit to expose her cunt even more. Karen took this as an invitation and proceeded to explore Joann's cunt, licking at her lips and finding her now juicy cunt hole. When Joann was about to cum, she could not refrain from helping. She took Karen's head in her hands and held her tight against her cunt. Karen reciprocated by poking her tongue deep into Joann's hole. And Joann came all over her tongue and mouth.

Karen kept up her tongue action until Joann's orgasm subsided and then she stood up. She reached forward and squeezed Joann's tits. She said that the next time, Joann would do the licking. She smiled and left. Joann told me that she fingered herself a dozen times that weekend thinking about catching Karen with her finger up her cunt and the cunt licking she gave. She has fantasized about catching girls masturbating ever since. I asked her if she ever returned the favor. Joann gave my ass a little slap and told me that would have to wait until the next night.

The next morning Dave woke me up and we took a shower together before my surgery. Dave said that we would not be able to fuck for a few weeks and he wanted to get in one last shot. We were in the shower and I was sucking on his gorgeous cock, when Joann opened the door. She looked over Dave and said I had good taste in studs. She told me to continue sucking but not to make him cum yet. She left and came back a moment later with an enema bag in her hand and without her uniform on. She told us that I was due for an enema before the surgery and she decided to stay late to give it to me. She turned off the shower and had me bend over so that I could suck on Dave while she filled my ass with the enema.

I am very used to receiving enemas and dildos and cocks up my ass, so it was very easy for Joann to insert the nozzle into my tail. She opened the clip, the warm soapy water flowed into my ass and I sucked very hard on Dave's cock. I held onto Dave's tight ass cheeks and bobbed my head up and down on his hard cock. Joann had not filled the enema bag as much as possible so it wasn't painful for even completely filling, but it was still very enjoyable. I wanted to cum and I wanted to cum soon. Joann pulled me away from Dave's cock and sat me down on the toilet to relieve myself. I emptied my ass and looked to Joann for more instruction. She looked at Dave, leaning against the wall with his cock sticking straight out. She told Dave that I had a nice looking ass.

He agreed. She asked him if he would like to fuck my ass. He said he loves fucking every hole I have. Joann had me stand up. She had Dave sit down with his legs together and stretched straight out in front. She had me straddle his legs facing away from him. Joann put her hands on my ass cheeks and guided me down onto Dave's shaft. When his cockhead was just barely into my asshole, Joann stood back and told me to bounce up and down, fucking my ass on Dave's cock. I have done this many times, but not with someone watching. It seems Joann really likes watching sex, so I began bouncing, slamming down, jamming Dave's cock into my backdoor. It did not take very long before I felt Dave squirt a stream of cum into me.

I hadn't cum yet and I wanted to, I wanted to cum desperately. Joann pushed me back against Dave. She lifted my legs and told Dave to take hold of them behind my knees. She told him to hold my legs up and open. Then she asked me if I had cum yet. I told her no. She asked if I wanted to. I told her yes. She pulled my cunt lips open and told me to finger myself again. As I moved my hand down to my cunt, Joann stepped back and smiled. She watched intently as I rubbed my clittie and poked my cunt hole. Soon she put her own hand into her panties. I pumped my finger in and out of my cunt as fast and as hard as I could. I wanted to cum right now. And I did. I turned my head and found Dave's warm lips and tongue.

When my passion subsided and Dave's softened cock slipped out of my ass, Joann had gone. We got up and Dave let me use the toilet again. Dave began to open the door to go, get dressed, when Joann returned. This time she was fully dressed, looking all prim and proper. She told Dave that he had better get dressed, since the orderlies would be by soon to collect me. Dave left and Joann showed me another enema bag, saying that now she had to clean Dave's cum out of my ass. This time she was all business so the enema was quick, painless and definitely not erotic. She had me rinse off in the shower and then she handed me a hospital gown. As we left the bathroom, she patted my ass and told me that she would have to go home and really make herself cum.

That night when I finally woke-up after my surgery, I had my right leg in a cast from my hip to my heel. I realized that several people had to have seen my hairless cunt in order to put that cast on me. I began to wonder if fingering my (now beginning to itch) cunt would the cast and my leg inside it. Dave was there and did what husbands

are supposed to do to comfort us at such times, he began to fondle my titties and kiss me. After a bit, he went to get the nurse to explain about my leg. The matronly evening nurse went thru all the regular stuff about trying not to move it too much. She did say that I had been asleep so long (it was now 11:00 pm) that the cast had had a long time to set and probably would not get damaged even if I fell off the bed. She also told me that because of the size and weight of the cast, I had been put on a liquid diet and that I had already had a catheter inserted so I would not need a bedpan. And then she marched out.

Dave stayed with me and just a few minutes after midnight Joann came in to take my temperature and all. It seemed like it would be harder to take a rectal temperature with my case on but she said that with Dave's help she could take care of it. She pulled the covers all the way off me and mentioned that three of the guys in the operating room had made complimentary comments about my cunt and that one of the nurses even went out of her way to take a long look at me. Joann had Dave lift my left leg up and hold it about 45 degrees to the side. Joann reached down into my crotch and parted my ass cheeks with two fingers from her left hand and inserted the greased thermometer into my asshole with her right. She went on to take my pulse and blood pressure leaving my cunt quite exposed for the whole process. She rested her hand on my cunt when she extracted the thermometer. She said she had to finish her rounds, and that she would return later. She told me not to finger myself while she was gone. I said good night to Dave (he still had to work the next day) and let him go home.

I sat here with my gown pulled up under the covers waiting for Joann to return. Waiting for a chance to make my cunt cum. When she did come back, she went to the closet and pulled out an overnight bag. She said that Dave had brought some personal items for me. She put the bag on the bed and pulled the covers down again. She opened the bag and rummaged thru it and finally pulled out my silver bullet vibrator. She said that Dave had done a good job in finding everything she wanted. Joann put the bag on the floor and told me to move my free leg so my cunt would be open to her. When I did, she inserted the bullet into my slick cunt.

Joann pulled my shoulders forward, untied the hospital gown and pulled it from my arms, leaving me completely naked save for the cast on my leg. She then took my hands, lifted them to the headboard and tied them there with a piece of surgical tubing. Finally she sat on the bed next to me and began to fondle my titties. She asked me if I wanted to know more about what she and Karen had done in nursing school. I nodded yes. She turned on the remote control for the vibrator in my cunt to a low buzz and began to tell me.

A few weeks after their first lesbian encounter, Joann came back to the dorm late one Friday night and found Karen slumped in her car quite drunk.

Joann decided to help her get inside. Since Karen had already vomited all over her blouse and jeans, Joann took her straight into the shower. She sat Karen on the bench

in one of the stalls and went to her own room to strip down. When she came back naked, she just turned on the shower and began to strip Karen. She piled up Karen's clothes on the floor. When she stripped off her panties, she realized Karen had been shaving her own cunt since their original shaving. Joann had been used as a subject since that first time but Karen had not, and yet Karen's cunt was baby smooth. Joann took the soap and washed Karen as thoroughly as she could considering Karen's unresponsive condition. When she finished, she dried Karen off and helped her to Joann's room (it was the closest).

She laid Karen on her roommate's bed (roommate was gone for weekend). Now she decided to inspect that smooth cunt up really close. She spread Karen's legs and began to stroke her hairless cunt lips. She pushed her lips open and gazed at Karen's pink little clit. She slowly rubbed Karen's passion button until she noticed a glimmer of fluid at her cunt hole. Joann finally gave in and pulled Karen's legs off the side of the bed, spreading her wide open. She knelt down between her legs, pulled her cunt lips open with her thumbs and plunged her tongue into Karen's cunt. She was quite surprised to find Karen's juices tasted very good (not very salty like the guy's cum she had swallowed earlier that night). She licked every nook and cranny of Karen's cunt, slowly exploring, tasting, experimenting. She found that Karen responded to long slow licks across her clit. She also found that after a few such licks, there was plenty of bitch cum to lick out of Karen's hole.

Eventually Karen responded more enthusiastically, by grinding her hips in rhythm with Joann's licks. Slowly at first, but then faster and faster until Joann was sure that Karen was cumming. Joann buried her tongue into Karen's hole and Karen humped her cunt against Joann's face until Joann was covered with Karen's cum. Karen slumped back to sleep and Joann knew she loved the taste of cunt. She wiped off her face, lifted Karen completely onto the bed, covered her, turned out the lights and climbed into her own bed. She had to finger herself three times before she could get to sleep. She tasted her own cum from her fingers after the first two creaming.

In the morning, Joann woke up to Karen pushing her legs open. When she protested. Karen told her that since Joann had taken care her the night before, now it was her turn to take care of Joann. Joann told her that she had already had a taste of Karen's cunt, so now if Karen was going to do any cunt licking with Joann, then it would have to be a sixty-nine session. Karen just smiled and climbed on Joann. Since Karen was on top, Joann got an up-close view of Karen's asshole while she mimicked Karen's cuntlicking actions. When Joann was getting close to cumming, she moved one finger to Karen's ass pucker and began rubbing it. Karen began bucking her hips more. Joann pushed her fingertip into Karen's backdoor and she began cumming.

Karen clamped onto Joann's clit when she began cumming and sucked hard, driving Joann over the edge. When they finished cumming and relaxing, they decided they needed a shower. Karen said she had to go back to her room to get a few things for the shower and that Joann should start and Karen would join her. After Joann had been in the shower for a few minutes, the curtain opened up and there stood Karen

with a few items in her hands. A filled enema bag in her left hand and a razor in her right. Joann took them and proceeded to properly clean Karen (inside and out). They spend the rest of the weekend licking, fingering, cumming and cleaning each other.

By the time Joann had gotten to this part of her story, I was on my third orgasm. My leg was sufficiently strapped to the bed so that I could wiggle around in the throes of passion without doing any damage to it. But since my hands were tied to the headboard, I had to rely on Joann's perverted nature to give me satisfaction. She manipulated the control for my vibrator regularly during her story, alternately driving up my passion and slowing it down to sustain my eventual orgasms. After my third, she turned the vibrator off and untied my hands. I grabbed her head, pulled her close and kissed her deeply, our tongues intertwining as much as tongues can. She pulled away and said that tomorrow night I would get something special. She tossed me my hospital gown and left. I covered myself up and went to sleep.

I rested alot that night and the next day because of my medication and was wide awake by the time Joann showed up for her first round of temperature and blood pressure readings. She told me she had to do a lot before she could come to visit and that I should rest. She intended to keep me awake for a long time that night. About two hours later, Joann came in with a prep tray. She filled a bowl with hot water and came over to kiss me. She stripped off my gown and spread my legs. I had inserted my vibrator earlier that night. She said I was a naughty little bitch for using it without my nurse's permission and pulled it out. She then proceeded to wash and shave my eager little cunt. When my cunt was clean and smooth, she refilled the bowl and gave me a complete sponge bath. (Sponge baths are very sexy) When I was completely clean, Joann kissed me very deeply, very passionately. Our hands explored each others tits.

When I began to unbutton her uniform, she forcefully took my hands and tied them to the headboard again. She asked me if I liked sucking on tits. I nodded yes, hoping that she would bare hers and feed me some nice nipples. Joann pulled a blindfold from her pocket and told me not to say a single word until she took the blindfold off. Then she covered my eyes and I felt her leave my side. I was alone, naked, shaved, exposed and very horny. Then I felt a pair of hands insert my vibrator into my cunt hole. I assumed that they were Joann's hands until I felt another pair of hands take my head and pull it forward until my lips rubbed across an erect nipple. I stuck out my tongue and licked at the nipple that was offered to me. Whoever she was, she pulled my head tighter to her chest forcing me to suck her nipple and part of her tit into my mouth. I sucked at her tit like a hungry baby. She pulled back and moved my face across her chest to her other tit and I sucked that nipple in. Someone was at the control for my vibrator and began giving me some intense oscillations.

The girl I was sucking moved her hands down to my titties and fondled them, squeezed them, pinched them, twisted them, and pulled them. Eventually I came and she abruptly pulled away and was gone. My vibrator was turned off and I was alone again. A few minutes later another set of hands fondled my tits. This time only one

hand pulled my head forward, because the other was cupping a huge mound of tit flesh for me to lick and eventually to suck. Her nipples were huge and soft and I sucked at them hard and fast. My vibrator was oscillating again and eventually I came and she went away. A few minutes more and another pair of hands, another set of tits, another orgasm and she was gone. A fourth set of tits, a fifth and then something different. This sixth session started with someone sucking on my nubs. She was slow, anxious, as if she had never tasted tittie before. Her hand moved from my tit, down across my tummy to my bare mound. She gently rubbed my mound until I spread my legs and began to push my cunt up at her hand.

She finally slid one finger down into my VERY wet slit. She slowly pushed her fingertip all the way down to my ass pucker and then pulled it back up until it stopped on my clittie. This girl then moved her tit to my mouth and as I sucked her nipple in, she began to slowly rub my clit in a circle. I knew that my vibrator was going to get a rest, but that my clit was about to get a workout. This girl was new to lesbian sex and she wasn't going to really fuck my cunt with her finger, she was just going to rub my clittie until I popped. She moved her other tit to my mouth and I sucked on her until her insistent rubbing made me cum. And then she too left. I was sweaty and fatigued and a cool, wet washcloth across my chest and face made me feel great. Joann removed my blindfold and washed my face. She washed my tiny titties in a rather clinical fashion and then my cunt (pulling my vibrator out). Then she went to the end of the bed and stripped off her uniform. She had on a white bra, white panties and white pantyhose. She sat on the bed next to me and unhooked the bra between her medium sized breasts.

She leaned forward until one nipple was brushing against my lips. I slowly sucked her nipple into my mouth as she untied my hands. I slowly moved my hands to her freshly exposed tits. (I knew I hadn't sucked on these tits earlier) Joann allowed me to fondle, tweak, pull and suck on her tits. She told me I had sucked on five different nurses. She told me that the third and sixth were the same girl. A brand new girl who had not yet gotten her nursing certificate. She begged Joann to let her have a second session. She even paid Joann ten dollars for a chance to get her tits sucked by me. She had gone across the street to her apartment and brought back her own vibrator to use on her cunt while she rubbed my clit and I sucked her tits. Joann pulled back, got dressed and let me sleep very soundly, fantasizing about a strange girl feeding me her tits and fingering my cunt.

The next day, they changed my medication so that I slept less during the day because I would be discharged the next morning. Not much happened that day and that night I was a little tired when Joann arrived to take my rectal temperature and blood pressure. She told me that she had a lot of work to do that night and could not visit until very early morning, but that she would be back to get me ready to leave at the end of her shift. I slept uneasily that night and then near dawn Joann woke me. She undid all the straps and pulleys that held my leg in its unmoving position. She helped me wiggle my ass off the bed and into a waiting wheelchair. She covered me with a blanket and we went for a ride. She took me down a few floors and into an unused

examination room. In the center of the room was a typical exam table complete with the stirrups to keep a girl's cunt open and available. I assumed she would put me up there and do something else to me.

But instead, Joann did a slow strip. First her uniform dress, then her pantyhose, then her bra (still hooked in front) and finally her panties.

She climbed onto the table and laid back, putting her legs into the stirrups, exposing her cunt to me. I maneuvered the wheelchair up real close. I leaned forward and began to lick Joann to the best orgasm I could give her. I licked her, fingered her (cunt and ass) and sucked on her hardened little clit. When she did cum, she came a lot. She practically gushed cum onto my face. I used her own cum to lubricate her asshole for my finger fucking. I finished her by rubbing her clit and tongue fucking her cunt hole while I poked her ass.

When she recovered, we went to an adjoining bathroom and I watched as she took a shower. I indicated that I wanted to see her poke her finger into her own cunt and asshole. She obliged me but did not make herself cum for me. When she was dry and dressed, She took me to the cafeteria and we ate a hearty breakfast, grinning at each other like naughty lesbian teenagers. After breakfast, she took me back to my room to dress and pack up my stuff. Then at eight o'clock, Dave came by and they took me to my doctor and he removed my cast, replacing it with a foam and metal splint. When Joann wheeled me to the front door, Dave went to get the car. Joann told me that she would be on vacation in a few weeks and wanted to do a full check-up on me then. I smiled and asked her if she could convince that novice nurse to help.
