

## Mouthsoaping Techniques

(By: [WHAP Magazine](#))

# Open WIDE, DARLING

What do you do when your man has a BIG MOUTH?

1. Wash it out.
2. Put it to use.

**B**esides the beastie between his legs, the male mouth provides more women with more aggravation than any other masculine body part. Sometimes it seems that men's mouths were made to offend. It need not be this way. For the male mouth serves a third function, beyond slurping and snarling. That scruffy snout of his is the nature's ordained accoutremonde, when it comes to providing you with pleasure supremis.

If you're not already a devotee of labial homage you should be, for there is no better path to your pleasure. Unlike the sly serpent between your lover's legs, man's other appendage is reliable and ever-ready. It requires absolutely no stimulation to come to attention -- or rest time to revitalize. Whereas a man might provide you with seconds or -- if you're fortunate -- minutes of pleasure, an orally obedient man can provide you with pleasure for hours.

But fantastic sex is only part of the bargain, when it comes to having an orally obedient man. An orally obedient man knows that he's welcome to "mouth off" to you -- if he's in your bedroom, on his knees -- and not otherwise. Beyond your bedroom, the well-trained orally obedient man uses his mouth only to speak compliments and utter pleasantries. And that's all. He keeps his thoughts to himself and his mouth completely shut, until its service is required.

Training a man to become orally obedient can be a formidable task, especially if your guy is a plain james/vanilla kind of fella, when it comes to your bedroom escapades. If your guy is like most American men, he was probably raised on a steady diet of "smelly fish" jokes and subject to all sorts of ugly locker room propaganda about female genitalia. Your purpose is to break through his misogynist misconceptions, by breaking him down. The good news is that, with a little perseverance and a dose of perverse fun, you can turn even the most strident stud into your compliant lapdog.

Your first conquest, as an oral adventuress, is to rewrite the ground rules in your sexual relationship. In short, you want to establish sex in his mind as your pleasure

and his privilege. Make your man regard sex as a reward rather than a right, and soon enough you'll have him on his knees, begging, at threshold of your heavenly gates. To do so, you'll want to make yourself alluringly attractive -- and hard to get -- at the same time. Use your knowledge of his weaknesses to lure him.

As soon as you have him wanting, tell your loverboy, in no uncertain terms, that you're bored with his joystick, and that if he wants you to play Mrs. Pacman with him again, that he's going to have to re-charge your batteries and make sex interesting -- for you. So go ahead and banish all missionary activities, at least for a while. Just be sure to keep him well-teased while you keep him hot and bothered.

Once you put straight sex on hold, you can begin to give your lover the opportunity to win your good graces -- by letting him kiss your behind -- figuratively and literally. Strip him. Lure him. Tantalize him with the promise of your body. Once he's begging he's ready to be forced down to his knees.

If he seems reticent, unsure of himself or just plain passive, tie him down to the bed. Straddle him. And remember that making him "brownnose" you is the best way you can forcibly introduce a squeamish guy to your netherworlds. Start by giving him the privilege of kissing your sweet posterior. If he doesn't like the back door, you can always just escort him to the front door -- with a swift kick in the pants. Otherwise, once he's well-acquainted with the dark side of your moon, you can start letting him work his way to your heavenly gates.

Technique? Feh. That's up to him to learn. On his own time. Send him to the Good Vibrations book and video catalog. Let him train his tongue on a mango. Of course, there's nothing wrong with letting him show off his new found techniques. On you.

Is your husband prone to outbursts of sarcasm? Does he simper? Does he sneer? Or is he downright obnoxious? Stand for this behavior, no more, ladies. The next time his teeth, gums and tongue conspire against you, make an appointment with your little man at the bathroom sink. Give that impudent yap of his a good scrubbing out with soap, just like grandma would have.

For a mild act of verbal insolence, my own personal choice for a lassitudinal lossenge would be a well-lathered bar of a sweet, feminine soap such as Camay or Dove. (I realize that there are now many sweet, mild, feminine soaps on the market but Camay and Dove remain my favorites for nostalgic reasons). The lathered bar should be vigorously rubbed across his lips and then his tongue for about thirty to sixty seconds. For more serious infractions, I would choose Ivory soap (my charge tells me that Ivory is the most bitter of the bar soaps), applied in the same manner, with his head held over the sink so that he can drool and spit the suds down the drain. Grasp him firmly by the hair (if he has any to grab) should he insist on squirming. It is essential that he be scolded and perhaps smacked on his bottom as he is given his mouth soaping, for the punishment to be fully effective.

Mouthsoaping is most often thought of as a punitive measure, but it should also be employed (forcibly or not) as a hygienic measure, before a man gives oral servitude to his lady. No woman should allow her lover boy to assume his submissive servitudinal position until his mouth and tongue have been scrubbed with a soapy washcloth and rinsed thoroughly with warm water.

Lord knows where their mouths have been.
