

Night Nurse

(By: Jinnilin)

I did a stupid thing, I not only joined the Army, but volunteered for combat. I got in on the last landing in the Pacific and ended up with a back full of shrapnel and a couple of weeks in the hospital.

Nurse Lynnette, a young brunette. I had to go back for some minor surgery to remove the last of the shrapnel after we had occupied Japan. She was the night nurse. All the wards were full, so I had been put into a new ward by myself. We started talking and on the second night she brought a small bottle of cream and asked me to tell her how to give me a rub down, to prevent bed sores she said. I started to turn over so she could put the cream on my back, but she said that was not the part she thought should be cared for.

Lynnette lifted the sheet and the hospital gown, she poured some of the cream on my thighs and asked me how to give a massage. Like the Japanese girls did. I told her and soon both of her hands were stroking my cock, rubbing my balls and I shot a stream of hot semen up into her face. She put her hand over the end of my cock for the second spurt and when I was drained, she carefully washed me clean, leaned over, kissed me chastely on the mouth and left me to sleep.

The next night was the same, except that I asked her to do as a Lotus girl would, kneel over me, between my legs. Then I told her about straddling my legs. Her skirt was too tight for that, so she pulled it up. I could see her creamy bare thighs over her stockings and the crotch of her panties. This night took longer and I taught her how to take her time, stroke me slowly and recognize when I was ready to 'cum'. The first spurt sprayed across her bare thigh and she captured the rest in her hand. Again she washed me clean. She returned toward the end of her shift and this time simply and quickly jerked me off. The next week went about the same every night, I did get her to take off her panties so that I could look under her skirt and see her furry pussy. She would also unbuttoned her nurses uniform so that I could see her tits and watch them as she practiced more and more giving me a massage.

Then on Sunday night of the second week, she did something a little different. Nurse Lynnette came to my bed as usual around 10:00 pm; then she stripped completely naked. She was careful to hang all her clothes over a chair beside the bed, and took a pan of water and washed me, taking care on my cock and balls. Then she bent over me and kissed the tip of my cock. I could see the curves of her thighs and ass, and the way her breasts hung under her body in the faint lights from the nurse's station. She kissed my cock again and then licked it with just the tip of her tongue.

What should I do? she asked. Tell me how to do a blow job.

I was stunned; I lay there breathing hard. She stood there naked with my cock in her hand. Then I started to tell her what to do. I told her how to lick from the base to the tip, how to suck on the head and run her tongue over it, then rub her lips and gently scrap her teeth on the more sensitive spots. She took to learning how to suck cock just as she learned how to give a hand job. Cold and methodically, but Nurse Lynnette did as I told her and she added some of her own ideas. My first orgasm sprayed semen all over her face and my

belly and thighs. She licked me clean and wiped her face with her fingers and licked them off. My next orgasm and all of them for the rest for the rest of the week were in her mouth. She told me that she had to learn to swallow too. By the end of the week she could take the whole length of my cock down her throat and she was swallowing everything that I shot into her mouth. She learned how to take each of my balls in her mouth and suck on them as she was stroking my cock with her hand. She was good.

The last night before I was to be let out and back on duty, Nurse Lynnette came to my bed as usual, but this time she told me that I needed a shower. I followed her in her crisp white uniform to the community shower in the ward. She told me to strip and get in and wash off. I did as she said and when I turned around she was standing there naked, her blond hair down past the middle of her back. She made me sit on a bench and she soaped my body from head to toe, then she knelt between my legs and started sucking my very soapy cock. I guess that just to say she was sucking me was an understatement; she was using everything I had taught her on the past 2 weeks. I loved it, but I wanted her. I stood up, she stood and started to argue with me, I pushed her down on her back on the bench, before she could protest too much I grabbed her legs and pushed my face into her crotch. I shoved my tongue up her crack and started eating her pussy. She tried to push my head away, but in a minute I heard her moan and she jerked like a puppet and had a deep orgasm.

I didn't stop licking her, but kept sucking her clit and using my tongue in her hole, she couldn't stop until I stopped and let her relax. I wanted to fuck here, shove my cock deep in her cunt and empty my balls deep inside her belly. I stood there with my cock throbbing and bouncing in front of me. I had different idea. I took a bar of Dial soap and kneeling between her legs as she lay on the bench, I started soaping her body, taking care to wash her twat and massaging her heavy tits. I spread the soap generously and slid my hand under her so that I was washing her bottom, then I slipped a soapy finger up her ass. I did it in one quick thrust and she jumped. Nurse Lynnett's body convulsed and jerked as I finger fucked her ass and she kept coming over and over again. I held her crotch so that I could reach her clit with my thumb and keep my soapy finger up her ass. I started massaging that swollen button. I controlled her body, she was unable to do anything other than have orgasms.

Nurse Lynnette had used me for 2 weeks to learn how to give a hand job and suck cock, now it was payback time. I started to spread her legs to fuck her, but when she realized what I was going to do she begged me to stop, she said that she was a virgin and please don't. Well her mouth wasn't virgin and so I turned her on her belly across the bench and spread her cheeks. My cock felt like a rifle barrel, I had used so much soap with my finger in her ass that my cock easily slid in. I slipped the head inside her and then grabbed her hips and rammed the full length of my shaft up her ass. She jerked again and I could feel her orgasm start. I just fucked her, in and out in long deep strokes. She started coming again and didn't stop until couldn't stand it anymore and even after her attentions of the last 2 weeks, the tightness of her ass was the most wonderful feeling of luxury and I couldn't last long. It felt like gallons of semen shooting down my cock, my knees felt weak as if my life was pouring into her belly. I rammed my hips against her soft ass and let one spurt after another spray into her.

My cock went limp and slipped out to lay in her crack, then I move weak kneed to sit on the bench beside her. Nurse Lynnette laid there, a thoroughly

fucked woman. She started to move and I grabbed her long hair. I pulled her off the bench onto her knees between my legs.

Wash me, was all that I said. She looked up; her eyes still a little glazed and picked up a bar of gold Dial soap. Her hands were gentle as she washed my balls and my cock, taking time to build up lather and spread it around. She stroked it and then rinsed me clean. I still had my hand tangled in her hair and pushed her head down. She didn't hesitate, but took my limp cock in her mouth and sucked it completely inside her mouth. She sucked it like a baby sucking a nipple, a pulsing feeling. She used her tongue as I had taught her, and was just a machine, a fucking, sucking sex machine to be used and discarded.

I pulled her head away and tipped it up so that I could look in her eyes, then I let her go and stood. I left her lying limp on the floor of the shower as I rinsed and dried myself. I went back to my bed.

It must have been an hour later when Nurse Lynnette showed up at my bedside. Her hair was tucked up under her little cap and everything was in place.
