

# Punishment Deserved

(Edited By: SoapyLisa)

It was a long time coming she has been a naughty whore just begging me to teach her who was in control. The day started like all others I was running late for work after a long night of taking care of the wife, so when I went down stairs to find the night before she had not bothered to even set the coffee pot up then to find no lunch had been packed other than that just set the mood for the rest of the day.

Yes it was my fault for being so easy on her and she did enjoy pushing her limits but she was soon to find out enough was enough. I went about my day knowing she would not be home tonight when I got there that she was going to be out late working.

As soon as I got home I changed out of my work clothes and got to work on her little surprise for tonight, not one she was going to enjoy either. As I got out all my favorite toys, I had to dig deep into the storage truck, for some reason she had stored those toys that she did not like to the very bottom. This also gave me another idea, one we have not tried before, a new type of bondage.

Taking out some very large anal plugs and two pairs of nipple claps, blindfold and my never ending supply of leather cuffs and some very rough rope along with a few other items she hasn't had the pleasure of yet, I headed for the bathroom to pick up a new cake of Ivory soap and then to the garage. I pulled out a clean bucket and ran hot water from the laundry tub into it and unwrapped the soap and let it float for 15 minutes. In the garage, I had been building a new toy but I wasn't sure till that very moment I was going to show her it.

I got out the saw horses that I had covered with padding and black leather, but had made a few changes and had it framed out so as to be able to have her arms cuffed overhead and a long board going out from the bottom so to spread her legs either together or spread far apart.

After lining everything up I decide to wait in the living room and just the light of the TV lit the room so when she came in I noticed she also had stopped off for a few drinks which made my plan even better. When she came into the room she said she was going to bed I told her to come over and kiss me good night.

Heading towards me like it was an effort I decide to act, I grabbed her and put her on the floor I had her arms handcuffed and the blindfold in place before she even knew what was happening. When she began to wiggle and protest I quickly shoved the ball gag into her mouth to silence her, then bringing her to her knees I walked her to the garage.

I felt her hesitate not knowing what I was up to I informed her that the day has come when she learns who is in charge. I quickly hooked her arms to the rings above the horse and grabbed her leg and threw over it. Her short skirt riding up her legs and it being a bonus she never wore underpants, next I added the ankle cuffs but waited to attach them, I started by ripping her shirt down and exposing her 38D cup breast her nipples already hard and waiting I walked away to get the riding crop.

The room was warm, she was blindfolded and her gag was to be replaced with a large cake of Ivory soap, I remind her who the boss is, "who's your daddy"! She began to complain as I removed her ball gag, now I am working up a lathered frenzy of soap suds in the hot bucket of water, she can smell Ivory soap and has no idea what is next. A quick insertion into her complaining mouth humbles her instantly! The air was silent then she heard it, before she felt it land on her right breast crying out threw the gag and wiggling all over trying to escape I repeatedly flogged her exposed breast. I then went and got a anal plug only about an inch thick and about 6 inches long I had lubed it up and pulled on her arms so she had to stand on her toes, that is when she felt the tip pressing against her ass, shaking her head silently begging me not to I pushed her feet out slowly while letting the slack out on her arms she slowly started to descend on to the plug.

Next I took the strap on vibrator that she hated to wear under her clothes whenever I ask I buckled it around her waist and brought the strap up between her ass cheeks which helped to keep the plug in place.

I then grabbed each leg and spread them far apart so she was snuggled up to the leather-covered horse. I went and sat down to admire my work after about 15 minutes I could see her starting to relax a little I grabbed the nipple clamps I leaned over and licked her nipples till they got hard like pebbles and snapped the clamps down, again I stood back and watched her wiggle I then took the second pair which I knew she hated with the sharp teeth and ran the chain threw the other clamps and clamped each side of her pussy lips, by now I could see a thin layer of sweat breaking out and had the chains just the right length that any sudden moves would pull roughly on her pussy lips. Her mouth is full of soap, suds are running down her chin.

#### Part 2

I left the garage to go get a cool beer and watch some TV. After about 20 minutes I went back and she was sitting still just becoming accustomed to the soap and clamps I picked up the riding crop once more this time I circled her the whole time telling her that I am in charge and she was for my entertainment and was going to learn to enjoy everything I did to her. So I began the flogging with each smack reminding her she was my slut and would make sure all my needs were taken care of from now on and she was going to learn to be good whore for whatever I wished.

After about 5 minutes of this I decided to remove the soap from her frothing mouth and to turn the vibrating ball on and watch her jump then wince as the clamps made their presence known again. I left her there once more withering in pain that I am sure she was going to come to enjoy. She was not allowed to rinse her mouth, she was so quiet, careful not to swallow any more soap suds. I placed the ball gag back in her mouth to keep her quiet.

After about a half hour I went to check on her and was surprised to see how wet she was just running down the insides of her thighs, sweat now pouring off her, I shut off the vibrator and pulled it away hearing her muffled cry I started to rub her hard clit. I asked her if she had cum, to afraid she shook her head yes I smacked her ass and told her she did not have my permission for that and would now have to be punished more, sobbing she lowered her head knowing she had not pleased me tears running down her face I loosened the ropes that kept her legs spread and told her to stand up as she did I slide the plug from her ass, I then went and got one bigger and lubed it up nice and told her to please me she was to know lower herself onto it and take it straight in. I was surprised to see her take it deep into her tight ass. Petting her head I told her very well I then took a fat dildo and shoved it deep into her wet pussy, reminding her she was not to cum again till I told her to.

I helped rinse out her mouth since it was burning her lips and tongue, she spat soap all over the garage floor as I let her gulp from the water bottle. She will taste ivory for days!

Again I spread her legs and tied them down and picked up the crop slowly running it all over her bottom, this time she remained still and I began. First I worked up and down her backside then to her spread legs and around to her breast after a few good slaps landing close to the clamps I stopped and released the nipple clamps leaving them fall over the horse they gently tugged on the clamps still attached to her swollen pussy lips. I began again with the riding crop this time working my way across her spread thighs and every once in a while a lite smack across her pussy. She was close to Cumming but I could tell she was fighting it, I told her since she has taking this much I would take the clamps off her pussy. Seeing she was relieved I still had another surprise for her. I again lessened her legs and told her to stand, I wanted to change plugs again this time to the largest one, as she sat back down onto the anal plug I could tell it was hurting, I tied her legs back spread out and tightened her arms and told her I would be back for her later with another surprise.

I went out to the living room and waited for her next surprise, a friend was coming over. Just then the doorbell rang and I knew she heard it I left my friend in and we decided to play some cards, after a while I told him to go say hello and see how the wife was doing.

As he opened the door he was very surprised to find my wife all tied up and spread out and so full of toys, he walked around her checking out my handy work then came back and told me nice job. We laughed for a while and played more cards I knew by know the wife was scared but she didn't know it was one thing to show her off but I would never let anyone else play with her at least not yet.

So after we finished up are card game my friend went on his way thanking me for the little show and I went back in to see just how my little slut was

doing, her not knowing with the blindfold on that my friend had left I walked in and started running my hands all over her. She did not know it was me or if I was alone or not I told her to stand after loosening her legs again this time I swung her leg over the horse and lowered her arms and chained both to the floor so she was now bent in half over the horse I then attached the nipple clamps back in place and told her I was going to take the gag off and she was not to say a word.

Flexing her jaw she remained silent but I could tell she was nervous not knowing we were alone again but she was dripping wet, I grabbed her hair and pulled her head back and slowly shoved my cock deep into her open mouth. Slowly I fucked her face then grabbed the riding crop again and started reaming her ass again. I stopped just when I was about to cum and walked around her I slide the anal plug out only to replace it with my cock, as I fucked her sore ass I told her she was never to forget her place and she was there for me and me only and to answer me to my pleasure she said "yes Master I am your slut, use me as you want I belong to you". I filled her ass with my cum told her she was starting to be a good girl and maybe I will let her cum later. Walking out the garage I went to get a cool beer and relax till I was ready to use my whore some more.....
