

## Primer System Tag For Reloading Presses with a Primer Feed System

(Item #T1747)

- Clips onto the Primer Feed System Tube of most progressive, single stage and turret reloading presses.
- Provides a 1" x 3" surface on which to write the type of primers currently loaded in Primer Feed System of your reloading press.
- Satin Silver Anodized Finish is low-glare and easy to read.
- Use a Sharpie®, Vis-à-Vis® or similar fine point marker.
- Easily erased using rubbing alcohol.
- Kit includes 100 white paper tags for labeling primer pickup tubes.

### CLIP

Clip the metal tag onto the primer magazine shield tube of the Primer Feed System on your press. If the primer system on your press moves with each press cycle (e.g. Dillon XL 650 Press) position it where it will not interfere with press operation.

NOTE: Peel clear protective film from front face of metal tag before use.

### WRITE

Use a Sharpie® ultra-fine point, Vis-à-Vis® fine point, or equivalent marker to write the type of primers currently in the Primer Feed System onto the metal tag.

### ERASE

Sharpie® and Vis-à-Vis® markers are easily and completely erased from the anodized aluminum surface using rubbing alcohol.

**Tip:** When the primer system is empty, write "EMPTY" on the metal tag.

### Paper Tags for Primer Pickup Tubes

This kit includes 100 small white paper tags for labeling primer pickup tubes. Any ballpoint pen or pencil works just fine for these. Don't forget that you can write on both sides of the tag for more room (e.g. primer manufacturer on one side and primer type on the other).

Removing the string and threading the tag directly onto the retaining clip (as shown at right) is recommended as it prevents the strings from becoming entangled when working with multiple primer pickup tubes.

**Tip:** You can color code the tags with a highlighter to further enhance identification. But apply the highlighter before writing on the tag so the writing won't be smeared.

The tag should be removed from each primer pickup tube immediately upon emptying the tube so as to prevent accidentally mislabeling the tube the next time it is filled.

**Tip:** The tags can be saved and used repeatedly. Just group identically marked tags together and store them on a spare retaining clip.

Note: Sharpie®, Vis-à-Vis® and highlighter markers mentioned above are not included.
