

Airgun Pellet Sizer/Checker

By The Shooters Box

– For use with all airgun pellets

Included: 1 Sizer/Checker Body
1 Plunger

Item #: T1778-xx

Specifications:

Material: Stainless Steel
Size: 3/4" Diameter x 1-3/4" Total Length
Weight: 2.8 oz
Laser Engraved: For Easy Identification of Caliber
Available Calibers: .177, .22, .25, .30

Works With:

✓ All Airgun Pellets

✓ Made in The USA on High Precision American Made CNC Machines.

Lead pellets come in inconsistent sizes and, having been banged around in the storage tins, most pellets are no longer perfectly round and dinged up ... especially the pellet skirt. This variance not only affects accuracy but can also affect how easy they are to chamber.

This Sizer/Checker not only checks the diameter but also functions at a pass-through die to resize oversized pellets to a perfectly round and accurate diameter.

How to Use:

- 1) Place Sizer/Checker on a hard flat surface.
- 2) Insert airgun pellet nose down into top of Sizer/Checker.
- 3) Use Plunger to press pellet through Sizer/Checker.
- 4) Pick up Sizer/Checker to retrieve sized pellet.
- 5) Inspect all pellets before using.

Undersized Pellets:

Undersized pellets are also possible. Any pellet that passes through the Sizer/Checker very easily should be considered suspect and not used.

When not in use, store Plunger inside Sizer/Checker to protect it.
