

Basic Master

16 hours – two days

This workshop introduces the full spectrum of the Shamballa energy and more to the entire mind/body/electro-magnetic system of the participants. It allows the person to feel and experience these energies and become acclimatized to them. These energies have a powerful grounding effect and start up a process of coming into more balance and Love. From this workshop onwards these energies will flow through the person continuously day and night supporting the process towards balance and Love and keeping it on-going. This allows the person to be able to share the energy with others simply by touch.

This workshop can be a wonderful first experience of working with and receiving these energies. Each person receives only what is appropriate and to their benefit individually.
