Type of Strategy: Rescue Recovery – secure site wait for TRT

Arrival Assessment	<input type="checkbox"/> Ensure that unauthorized and /or untrained personnel, including Fire Department Personnel, do not enter.	<input type="checkbox"/> Move all workers and bystanders away from the entrance to the confined space.
	<input type="checkbox"/> Locate and secure site foreman/supervisor, attendant, and reliable witness and keep at the command post.	<input type="checkbox"/> Obtain Entry Permit and atmospheric test results if available.
	<input type="checkbox"/> Determine the last seen point and number of victims.	<input type="checkbox"/> Attempt to establish contact (voice, sight, touch) with the victim(s) while remaining outside the confined space.
	<input type="checkbox"/> Attempt to determine the mechanism of entrapment, nature of trauma, or nature of medical emergency.	<input type="checkbox"/> Attempt to shutdown all equipment, from outside the place, that is located inside of the confined space.
	<input type="checkbox"/> If possible begin ventilation of the confined space with exhaust fan.	

Scene Evaluation	<input type="checkbox"/> Determine if the victim(s) are wearing protective clothing and/or respiratory equipment.	<input type="checkbox"/> Determine electrical, mechanical, and chemical hazards in the space.
	<input type="checkbox"/> Determine if the workers performed any hazard control operations.	<input type="checkbox"/> Determine the type of work being performed in the space.
	<input type="checkbox"/> Determine the number and locations of access points into the space.
