

STAMFORD SPOTTING CHEMICALS

Basic

- **P.O.G** - A fast, effective spot remover for paint, varnish, grease, oil and lipstick. P.O.G. is compatible with all detergent systems and is safe on most fabrics.
- **PROTEEN** - A fast-acting, quick-rinsing wet side spotting chemical for blood, egg, milk, and all other protein stains derived from animals or humans.
- **SPOL** - A safe all-purpose spotting product which contains both wet and dry components for use on unidentified stains, food, grease, many inks, oil, collar and cuff soil.
- **SPOT-BUSTER** - An outstanding prespotter, penetrant, and wetting agent. It is mixed with 4 parts water for application by spray or brush or may be used full strength on heavy soil.
- **S.S.S** - A gentle spotting agent specially formulated to remove oily or water soluble stains from fragile fabrics such as silk, rayon, and sheer polyester. S.S.S. may also be used as a leveling agent.
- **TRIK** - A safe, effective spotter for tannin stains such as coffee, tea, beer, soft drinks, liquor, fruit juices, grass stains and mustard.
- **STRIKE** - A versatile pre-spotter for use in all solvents, including Hydrocarbon, GreenEarth, K4 and blended solvents. This spotter effectively removes soil, perspiration, grease, and other difficult stains in the wheel. Can also be used as a leveling agent.

WETCLEANING PRODUCTS

WETCLEEN

Detergent for Wetcleaning Fine Washables - WETCLEEN is a unique, highly effective, non-alkaline, wet side detergent for fine washables. It may be used in cold or warm water in standard washing machines, specialty wetcleaning machines or for hand washing. WETCLEEN is gentle enough for the most fragile fabrics and does not require rinsing. It leaves garments pleasantly soft and wrinkle free and makes finishing easier. Garments will retain their original depth of color and finish.

L.P.S

L.P.S. is designed to lift tough ground-in soil and oily stains from washable garments and is particularly effective against shirt cuff and collar soil. L.P.S. is safe on nearly all fabrics and dyes and will not set stains. It is compatible with all wet-side detergent systems and can also be added with the laundry detergent as a booster to remove greasy soil. Mix 50-50 with Stamford SPOT-BUSTER for prespotting of heavily soiled collars.

DRYCLEANING PRODUCTS

- **BRITE-LIFE**

A modern, unique and versatile drycleaning detergent which may be used in hydrocarbon or perchloroethylene solvents. Some components of this formulation are attracted to the fabric and some remain in the solvent. Because of this, it may be used in an injection system or as a charge. BRITE-LIFE provides excellent soil removal, superior redeposition control and produces bright whites and colors. It operates well with any type of filtration system and provides static and lint control. Garments cleaned in BRITE-LIFE have a soft, pleasing hand and are easy to finish.

- **HYDROCARBON DETERGENT**

A modern charge or injection detergent formulated with surfactants based on renewable raw materials (80%) for use in all types of hydrocarbon solvent, including modern high-flash solvents. It will also provide excellent soil removal and control redeposition when used in either a charge or injection system
