“An eclipse is a cosmic reminder that the universe is not a random collection of matter and events that happened by chance. The cosmos is so finely tuned that we can know precisely where every heavenly body will be 200 years from now, down to the minute. These events remind us that the universe is not an accident, and neither are we. God made both, and He is in control.”

–R. L. Solberg

How could anyone not believe in our creator?
