

Projector Protector Wall Mount

Ensures only authorized personnel can access the unit Allows the user to make tiny adjustments without the use of any tools Make any wall in a room a viewing area Storage space, allows for clean and easy storage of cables that run from the tray through the pipe Easy access for equipment or wire swaps Key alike to any of our other locking devices for master access, or key differently for responsible controls Provides maximum security by completely enclosing the AV unit, preventing anything from touching or accessing bulbs and ports

Micro-Adjustability

Creates a smooth, fast and easy installation without the use of tools.

Key Lock Security

Projector Protector secures your projector with a high security, pick resistant screw type lock that can be keyed differently or keyed alike.

Easy Maintenance

Two interlocking steel trays provide access and stability to projector during maintenance.

Note: Projector Not Included
