

Downtown Programming

What is Programming?

Programming involves taking stock of the available assets and spaces, and programming uses that will help improve existing businesses with symbiotic purposes. This process will build upon the available amenities and define future uses for critical properties

<https://tinyurl.com/DRSPprogramming>

Programming relies heavily on an on-site process that will define community-specific parameters for revitaliation, including:

Targeted Development

Symbiotic relationship development

Site Activation

parcel specific recommendations for improvements

Implementation Framework

You can monitor the progress of your home from anywhere.

\$9,500

Downtown Programming Visit

This three-day, on-site, service is an all-inclusive price of \$9,500 and will yield a detailed analysis and implementation framework to help drive your economic development within your downtown.

\$24,000

Regional Planning Visit

This service is meant for three or more communities and includes up to two-days in each community, offering an all inclusive pricing that starts at \$24,000. The results will yield a detailed analysis and plan, including a framework with goals and strategies for all participating communities.

Creating a Strong Framework

The final product from the downtown programming is a detailed and easy to follow toolkit that will help empower local business and property owners to become the catalyst of their own communities revitalization efforts.
