

Curing the "INCURABLES"

There are no incurable diseases, but at times there are incurable patients. The Creator has given herbs and assisting wholistic therapies for every type of body malfunction. If they are used, benefits will come. But if they are not used as directed, they can be of no aid.

Over the years, we have put together a healing program that has done miracles for those who have conscientiously used it. It has even brought people who were supposedly on their death beds back to a full and active life. Yet, this program yields no results unless the instructions are followed carefully.

No one can truly tell a patient that he or she has just so many days, weeks, or months to live. The scriptures plainly say that "everything moves in its time and season; there is an hour to be born and an hour to die." We have seen cases where the person was told that he had only a few days to live, and many of these people are alive and well today, because they had faith to turn to the natural ways of healing and have been healed.

For example, the parents of a small child, about eighteen or twenty months old, were told by their family practitioner that the child would not live until morning. He had a severe case of pneumonia. They lived in a rural area too far from a hospital. It was subzero weather, and the doctor said the child would die enroute to the hospital by car. He explained that he would return the next morning and sign the death certificate. The parents had the hope and faith that the child could be saved. After the doctor left, and after much telephoning, they were referred to us at about midnight. When we arrived and gave him natural healing aids, the child was soon sleeping comfortably. The next morning when their doctor came to sign the death certificate, the child was sitting up having some juice for breakfast.

We have seen cases where the patients were lying helpless on their bed so sickly they could not feed themselves and were waiting for death at any moment. These people, by correctly utilizing this wholistic healing program, are alive, active and well today.

Even when a person is near death and suffering great pain, the natural healing procedure can be used to reduce the pain and give comfort in the last hours. Every one of God's children deserves help to ease unbearable conditions with helpful but harmless natural aids.

2 • Curing the Incurables

This program has been used for many different malfunctions with great success in nearly every case: multiple sclerosis, muscular dystrophy, stroke, deteriorating bones, curvature of the spine, locked arthritis joints, tumors and cysts in nearly all parts of the body. We have seen great improvement-reduction in pain and often complete healing in these cases which are supposedly incurable. As in all natural healing, this program works with the body to cure itself and does not use any addicting medications or harmful therapies to affect health.

DR. CHRISTOPHER'S INCURABLES PROGRAM

The patient may have suffered in their chronic condition for a long period of time. Because of the years of improper eating, the body is now suffering from malnutrition. This is because food is not being assimilated, causing starvation of the bodies cells. It is not the amount of food that has been eaten that matters, but the quality and how well it has been assimilated. We may take a healthy quantity of food into our bodies, but only that which has been properly assimilated can be utilized for rebuilding and repairing cells and malfunctioning areas. Proper assimilation is acquired by drinking the solid foods and chewing the liquid food. This is an old and true axiom. What this means is we should thoroughly chew our solid foods which mixes the saliva with the food until it becomes liquid, and then we drink it. The liquid foods must be swished (or chewed) in the mouth, then swallowed. The saliva thoroughly mixed with the foods is the key that opens up the doors of digestion. Without mixing saliva with the food, the balance of the digestive juices are not activated for good assimilation. By gulping or inhaling our food without properly mixing saliva with it, we get only eight to ten percent of its value. By properly chewing, we can raise this to forty or forty-five percent. The remainder is generally cellulose or indigestible fiber. We not only receive better health but also save money. Food is one of our largest expenditures. If we can get four to six times better assimilation and use four to six times less food, we are saving a lot of money! By this simple method alone, which gives better assimilation, we gain superior health and a happier life. With one fourth or one third of the food we have been used to eating, we can receive much more power and energy. Remember, a large part of attaining good health results from chewing both solid foods and liquid foods.

The First Week of Wholistic Aid

Food Many people feel that without three large meals of solid food each day they will starve, shrivel up and blow away! Dr. N.W. Walker in his book, Fresh Vegetable and Fruit Juices, and Johanna Brandt in her book, The Grape Cure, both show that juices alone sustain health for a long time in addition to healing the body.

The following suggestions are for a persisting chronic condition, not an acute one requiring emergency treatments. For the first week, drink as much fresh carrot
