TESTIMONIALS

"...I also want to point out the value of this project as a prototype that could create a new future of seniors across the country."

- Gian-Carlo Carra
City of Calgary Councillor

This innovative model of housing will offer a unique approach to the delivery of community-based supportive living in Inglewood. This project fits in perfectly with the concept of Aging in the Right Place.

- Phil Levson, Inglewood
Community Association

This model will address these issues by establishing a housing option that enables seniors to age-in-place, allowing them to maintain a level of independence and integration into their community, while providing supportive services. An added benefit of this project will be the opportunity to replicate this approach in other communities in Calgary...

- Ralph Hubele Senior Manager
Health and Housing Initiatives

**There will be close to
1,000,000 seniors
within 13 years.**

Be a Game Changer.

Elderhouse changes the face of seniors' assisted living. It respects the right and desire of seniors to remain as active and functional members of **their** home community. Elderhouse grew from conversations with a community that respects and values their seniors and conversations with seniors who want to be decision makers, not dependents.

Elderhouse can be duplicated in all communities.

IMAGINE 1 IN EVERY COMMUNITY... A POTENTIAL TO HOUSE OVER 5000 SENIORS!

REAL PEOPLE. REAL STORIES

"Lorna supported herself working for "temp" agencies, without benefits. She feels fortunate with a subsidized senior's apartment. She is not sure where she can go when she needs more support."

BERNIE NEEDED HELP.

Bernie lived alone in the same community all her life. She found herself completely immobilized and was found several hours later by her neighbour, who stopped in. What if no one came?

"Don't take away our choices."

"I am a senior living in Inglewood House. I have volunteered with the Jack Long Foundation since the start and at the Inglewood Community Association since 1967. We need this facility as soon as possible as we are getting too old and fragile for the existing facilities."

"...For myself, I would like to stay in this neighbourhood as long as possible and such a facility built in my community will enable me to stay longer than I might have expected."

Delores was born and lived in her house for ninety-eight years. She vowed never to leave. Some basic physical issues forced a move away. She never celebrated her ninety-ninth birthday.

ELDERHOUSE® ADVANTAGE

Affordability. Age-in-Place. Dignity. Respect. Community.

- A different perspective:** Healthy living; not managing health conditions.
- Home within a home:** Independence, privacy, companionship.
- Recognizing value:** Seniors contribute to their community.

"I want privacy."
Private suites for singles or doubles, with private washrooms.

"I like to bake... just like at home."
Open kitchen where residents can be involved in meal preparation, and house activities.

"I worry about being lonely."
A shared home with central social spaces.

"I don't want to be isolated."
Situated on a community street amongst other homes.

SAFE AFFORDABLE HOUSING FOR UP TO 23 SENIORS
17 SUITES
13- Assisted living
3 - Transitional
1- Overnight caregiver
