

# Image Surveys Limited is a carbon neutral business.

## Reducing Carbon

Image Surveys is committed to reducing its carbon footprint, so it adopts the following policies:

### Service Delivery

- To use public transport where feasible for appointments
- To reduce site visits by using alternate methods of communication such as video conferencing and use of video to assess instructions and provide quotes where possible.
- To walk to work
- To concentrate efforts on generating 75% of work within a 50 mile radius of the studio to reduce travel
- Use cloud-based storage and electronic delivery to reduce need for separate storage devices, portable drives, plastic CDs and DVDs
- To use multi use rechargeable batteries for powering equipment
- reduce consumption of electricity by choosing energy efficient equipment
- to promote to others the benefit of carbon neutral policies and practices and to look to use carbon neutral suppliers.

### Recycling

- To recycle or sell old cables, equipment, and power supplies (including batteries)

- To use rechargeable power where practical to power Equipment
- to make use of second-hand equipment and not purchase “vanity upgrades” where possible (but never to the expense of quality or safety for a client).

## Carbon Offset

To reduce remaining carbon usage Image Surveys Limited has signed up to the Carbon Neutral Britain programme that offsets small business carbon usage through approved schemes that are recognised internationally and includes planting 30 trees per month.
