NEW!

PREMIUM SPLIT STOPPER

Newly developed to reliably preserve the value of your wood. With the Premium split stopper you prevent splits from spreading deep into the lumber – so when it comes to preserving value, you are well and truly on the safe side with Latschbacher.

- extremely high tensile strength
- simple placement on the Premium hammer
- no tilting when hammered in
- full penetration with a single hammer blow
- suitable for sawing

PREMIUM SETTING HAMMER

A special joint designed by Latschbacher ensures full force transmission and a level impact, even when the hammer is swung at a slight angle or onto unevenly cut surfaces. This guarantees clean and full penetration of the split stopper with a single hammer blow.

- forged hammerhead for extreme durability
- balanced centre of gravity for non-tilt, simple setting
- ratio of handle-length to weight ensures perfect impact force
