

# THE McTIERS

Lucy & Jace McTier

---

2019 exhibition

April 6<sup>th</sup> – July 12<sup>th</sup>

The McTiers showcases two generation of artists, Lucy and her son Jace. Their artistic method focuses solely on portraits encompassing the expressionism of legendary and iconic athletes, Latin entertainers and artists.

ModArt also had the opportunity to expose a unique collection at the Hard Rock Stadium during and dedicated to the Miami Tennis Open. Now, we present to you the mix of sports and entertainment along with a touch of the ocean that vibes in South Florida, precisely... Miami.

The McTier family is among the few artists that have achieved notoriety in the Contemporary Sports Art genre.

Miami has become a part of my soul - my transition in art from realism to the colorful expression that now encompasses my work was learned and exercised on the very walls in Wynwood. My first painting of Muhammad Ali, "Impact", (that I created as a teenager), was transformed into

the Wynwood mural "Off the Ropes" over a decade later. In the former I had discovered my love of motion and, in the latter, that knowledge was combined with a vibrant expression of color, testifying to the passionate human spirit that we all possess.

I had found that very spirit in myself through the hues and energy of Miami. The art that I created for this showcase expresses the pulse that I found while spending time with various legends, kings and "normal" folk that live and breathe the rhythms of the "Magic City" on a daily basis. They have all greatly shaped the artist I am today

**"Frida"** Lucy McTier, 2019, Acrylic on Metal, 48" x 36"

Painting this series of artists was a breath of fresh air. I can relate to these spirited people who, through their unwillingness to give up or give in, made art to transform the lives of others. The best art is born out of pain, conflict, and rejection.

Many know the story of Frida Kahlo and her love for art at an early age. Her photos and self-portraits do not convey the same persona. Her self-portraits depict a self-willed artist with outpourings of great pain and suffering both physically and emotionally. Her resilience in the face of personal rejection is what we see in her photography. In her art, I see another woman: she is both open to us and defiant in the constant shadows of suffering and death.
