

# EC-3440-C

## Acid Job Surfactant

**EC-3440-C** is a unique cost-effective surfactant/solvent blend used for well stimulation and to enhance acid job performance. In addition, **EC-3440-C** can be used to increase injections in saltwater disposal wells.

**EC-3440-C** is especially suited for applications where temperatures exceed 160°F, and works in environments up to 300°F.

**EC-3440-C** is formulated to be used full strength. Preceding acid jobs with ten to fifteen gallons of product is recommended.

Saltwater disposal wells can be continuously injected or batch treated as needed. Continuous injection rates are typically two quarts of **EC-3440-C** per one thousand barrels of water.
