

EC-4010-C

Saltwater Disposal Well Surfactant

EC-4010-C is a unique cost-effective surfactant blend to be used in the stimulation of saltwater disposal wells. EC-4010-C enhances saltwater disposal well performance as well as acid job performance.

In addition, **EC-4010-C** can be used to prepare the formation prior to acid jobs. **EC-4010-C** is designed to be used in systems with temperatures less than 175°F.

Dilutions of one drum of **EC-4010-C** will produce four or five drums of field strength surfactant. Water and/or methanol can be used to dilute this product.

Field strength product should be stored in plastic or stainless steel drums.
