

## IMPORTANT - USE OF GRATE

The life of the grate is dependent upon the user. Ashes that build up under the grate must be removed after every burn and moved away while burning to allow air to circulate. Ashes touching the grate will eat away at the steel and will decrease the life of the grate.

**NOT FOR USE IN WOOD STOVES OR INSERTS**

**\* Ashes must be kept clear of the bottom of the grate to allow the grate to cool or the warranty is void.**

- \* Always use seasoned hardwood
- \* Build moderate fires
- \* Never use petroleum lighter fluids
- \* Clean the chimney at least once a year

### WARRANTY:

Custom Firescreen warrants this product to the original purchaser to be free from manufacturing defects. Under this warranty, this product will be replaced, at our option, for its life with the original owner without charge when proof of purchase has been provided.

Shipping and handling charges will be the responsibility of the original purchaser.
