Culvert and Bridge Webinar Summary

I watched the Culvert and Bridge Webinar this morning. I will summarize the results below and a copy of the webinar will be available on the WTA website later this week.

- 1. The Wisconsin legislature has appropriated \$12.5 million to identify and inspect all culverts and bridges that are between six and twenty feet in length within the state. The length is measured along the flow of traffic portion of the highway not the width of the bridge or culvert.
- 2. A road section with two or more side-by-side culverts may qualify if the total length beneath the road is at least six feet.
- 3. There will be three phases to the project:
  - a. An Identification Phase
  - b. An Inspection Phase
  - c. A Load Rating Phase
- 4. The Town of LaFollette is responsible for only the first phase, the Identification of the bridges or culverts. The county or its designee will be responsible for all other phases. We may contract out the Identification phase should we desire.
- 5. The town will be paid \$100.00 for each culvert or bridge identified that is between six and twenty feet. A spreadsheet will be provided by WisDOT with the information required to be collected and completed. Once completed it will be forwarded to the Burnett County Highway Commissioner for uploading into a central database.
- 6. We must notify our county highway commissioner by April 15, 2024 if we are going to complete the inventory or if we are going to hire an outside company to complete the work. The Inventory Phase must be completed by December 31, 2024.
- 7. The Inspection Phase and the Load Rating Phase will be completed under the supervision of the Burnett County Highway Commissioner. We are not involved in these two phases.

We can discuss our next steps at the February Board Meeting.

Let me know if you have any questions.

Regards,

-Scott
