

DEAR NEIGHBOR

Help us eliminate gas-
powered leaf blowers!

GAS-POWERED BLOWERS:

-  Produce dangerous levels of noise
-  Produce hundreds of times more pollutants and fine particulates than automobiles
-  Cause dried animal feces, pollen and mold to become airborne
-  Erode, compact and dry out soil, which harms plants, including street trees
-  Destroy pollinator habitat
-  Disrupt learning and working
-  Contribute to hearing loss
-  Contribute to hypertension
-  Contribute to climate change
