WEBB VISION

Vandal-Resistant and "Touchless" design keeps you and your building SAFE.

VISION-REALITY
The "Touchless" touchscreen entry system

The Webb Vision-Reality is a web-enabled entry system specifically design for multi-residential buildings and office towers. Stylish and modern, the Vision-Reality truly brings together form and function with a gesture-controlled **"Touchless" screen that functions up 6" away** leaving you **SAFE FROM SHARED UNHYGIENIC SURFACES**. With the multi-lingual voice prompts and complete integration into the Webb Vision product line this product ensures you building is also ADA and AODA compliant.

- **The REALITY is SAFE**
- **The REALITY is HYGIENIC**
- **The REALITY is HERE!!**

The Webb Vision-Reality is unlike anything on the market and sets a new standard for entry systems. It is only **2 3/4" thick and can be mount BEHIND double pane and armoured glass.** The Vision-Reality **comes in 32",47" and 55" "Touchless" display** supporting 20 simultaneous touch points with a seamless bezel-free design. The Vision-Reality has all the key security requirements you would expect from a state-of-the-art system including lobby door and/or elevator floor restrictions and scalability to incorporate future reader technologies.

VISION-REALITY

Webb Vision-Reality Entry System

All events are logged with optional motion video and audio capture for every visitor Accessing the Entry Phone. The Resident may: Allow Lobby and/or Elevator Access or Reject the Caller via the App or a by pressing 6 or 9 for a conventional audio only call.

Optional features include incorporating a built-in camera to read a temporary 2D QR code displayed from a printout and a smartphone to grant access or call a resident or property manager immediately.

Communications

The entry phone provides three modes of communication, PSTN, VOIP and cellular services, thus permitting the lowest cost installation and highest possible features for any client. VOIP permit unlimited simultaneous voice and video channels via the Webb Vision App.
