

## ABOUT US

Established in 1985, Webb Electronics began its history as a elevator telephone manufacturer. After 20 years leading in the emergency communications industry we expanded our expertise into other methods of communications two way audio video in the elevators and now two way audio video on entry phone systems with a Android and iOS.

With over 100,000 clients in service, we are proud to say that Webb equipment is being used by most some of the most high profile locations in the world. Our continuing policy having "feet on street" for field maintenance and system installation allows us to directly observe how well our intercoms and entry phones are working and make ongoing improvements. It is our strong belief that there is no substitute for this "real world laboratory" in providing you with excellent products.

## PIONEERING A NEW VISION OF ENTRY SYSTEMS

Webb Electronics has pioneered a new intercom entry system that will transform the access-system industry. The revolutionary Webb Vision Products are web-enabled entry phone solution specifically design for multi-residential buildings and office towers. Stylish and modern, the Vision Product line truly brings together form and function with a gesture-controlled touch screen, multi-lingual voice prompts and complete integration into the Webb Vision product line.

### NORTH AMERICAN DESIGN, R&D, AND PRODUCTION

For over 35 years Webb has proudly designed and produced products for the international market with Engineers, Designers and Production Staff in North America. With a tight control on our product design and engineering has allowed to be flexible and responsive to client requests and features.

### THIRD PARTY INTEGRATIONS

Our engineer have currently written integrations well known access control, camera, and visitor entry systems such as GALLAGHER, AXIS, ICT, SES just to name a few. This allows the consumer to have a single user browser interface and APP to control their visitor system and access control.
