

Carbon Reduction Plan Template

Supplier name: Adept Locums Limited

Publication date: August 2023

Commitment to achieving Net Zero

Adept Locums Limited is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2021	
Additional Details relating to the Baseline Emissions calculations.	
Historic baseline, no prior scope 3 emissions reporting.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1 Direct emissions	0%
Scope 2 Indirect emissions	3,395 Indirect impact from electricity & fuel
Scope 3 (Included Sources)	0
Total Emissions	3,395

Current Emissions Reporting

Reporting Year: 2023 YTD (Year 1)	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1 Direct emissions	0%
Scope 2 Indirect emissions	3,127 Indirect impact from electricity & fuel
Scope 3 (Included Sources)	0
Total Emissions	3,127

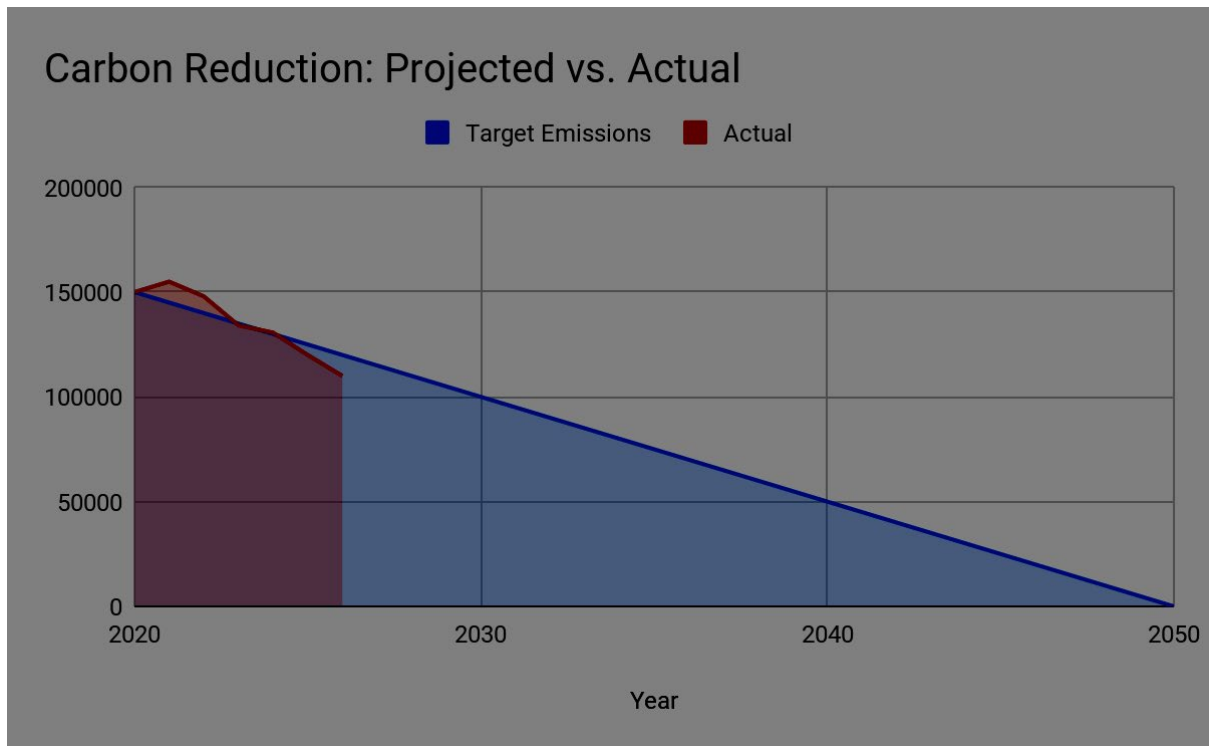

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

- Make driving more efficient (reducing mileage)
- Reduce the usage of electricity
- Promoting Environmental Management System
- Reduce the use of non-recyclable materials

We project that carbon emissions will decrease over the next five years to 2900 tCO₂e by 2026. This is a reduction of a minimum 14%

Progress against these targets can be seen in the graph below at the end of year 1 against the baseline.

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2021 baseline. The carbon emission reduction achieved by these schemes equate to 1,358 tCO₂e, a 14%ge reduction against the 2021 baseline and the measures will be in effect when performing the contract

To date we have completed the following carbon reduction projects:

- Environmental Management System, ISO 14001
- Implementation of an environmental policy

In the future we hope to implement further measures such as:

- Travel Policy for reduction of emissions
- The use of renewable energy
- The supply and use of electric or hybrid company vehicles

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

A handwritten signature in black ink, appearing to read 'A. Smith', written in a cursive style.

Date: 25th August 2023
