

Create a culture of true cross-team collaboration

The ever-growing complexity of projects makes it more difficult than ever for teams to get and stay in-sync. Revizto is an Integrated Collaboration Platform that provides a single source of truth for all disciplines and trades regardless of technical skill level - for 2D or 3D environments.

Revizto empowers users with real-time access to the critical data they need, when they need it from day one on the project - from any location and any device. Better access to better data means better decision making.

Over 3,000 firms around the world, including 20 of the top 25 ENR firms enable their teams to make better decisions, minimize rework, drive accountability with Revizto.

“ Revizto is used on all of our projects. I wouldn't hesitate to recommend this software to anyone in the AEC space. The Revizto team is brilliant and knowledgeable and they got us the results and resolution we wanted.

Key features

Central Hub for All Models

View the entire project by federating all intelligent BIM data into a centralized user-friendly location and get all teams in-sync.

Clash Automation*

Use an integrated solution that combines clash detection, grouping, workflow builder and issue tracking into a single environment.

2D/3D Model Synergy

Leverage a unique 2D/3D combined view, easily compare 2D sheets and seamlessly work with live common data environment (CDE) documentation within Revizto.

VR Immersive Experience

Explore Revizto's immersive, true-to-scale VR experience within seconds. View real-model data and identify coordination issues earlier on in the project.

Real-time Issue Tracking and Reporting

Standardize the way data moves throughout the project and effectively communicate model-based tasks, and drive accountability across teams.

Seamless Collaboration from Anywhere

Contribute from the office or on-site. Keep trades on task, monitor field progress and access all the project data on a mobile device.

Revizto is the industry-leading Integrated Collaboration Platform (ICP) used by Architects, Engineers, Contractors and Owners to maximize workflows throughout the project lifecycle. Revizto empowers teams to drive accountability, mitigate risks, improve timelines and maximize cost-savings by enabling real-time collaboration across platforms, model types and teams, from in-office, on-site, and any device. Revizto was developed in 2011.
