## **SPACE – to INFINI-D AND BEYOND!**

### **KOLLAB YOUTH AND INFINI-D LEARNING PARTNER FOR STEM PROGRAM TO MIDDLE SCHOOL STUDENTS!**

*The SPACE MISSION event held on January 21st at the Ft. MacArthur Air Force Base in San Pedro was attended by approximately 45 youths ages 9 to 14.*

*The youth were greeted by host Pat Brown, Flight Chief, Child & Youth Services who provided information about the base and the program for the day.*

*The youth were focused on Kollab Youth's Lance Holliday to get prepared for the day of both mental and physical preparedness.*

The majority of youth rated the experience as a 9.2 out of 10.

85% felt that the challenges with the mission taught them how to think fast and pay attention to detail.

The majority expressed that the program helped them with team work, collaborator and would like to do the program again.

# RECOGNITION INFINI-D LEARNING

Kollab Youth and Infini-D Learning partnered to hold a STEM Space event for 40 middle school students on Saturday, January 21 at the Los Angeles Air Force Space at Fort MacArthur.

The Space mission for middle school students, is a program that lets students run interactive missions with the whole group and have comprehensive data on their performance. "This special program was so impactful for the 5 to 8th graders. Youth learned leadership, team work, initiative, STEM careers", stated Mary Hewitt, CEO of Kollab Youth.

## INFINI-D LEARNING

JAMES KING INFINI-D LEARNING

"Each mission is a dramatic story that requires students to collaboratively apply what they have learned in class in order to be successful. This STEM experience embodies the pillars of Kollab Youth - problem solving, communication, collaboration, critical thinking, time management, prioritization, initiative and creativity, which is why it made sense to take this partnership to the next level, stated James King, Vice President for Infini-D Learning.

We want to thank the Los Angeles Air Force Space at Fort MacArthur team for holding this pivotal and impactful event. "We gained quite a bit by offering our students this opportunity to explore and learn about an industry they thought perhaps was out of reach or that they never considered", stated Patricia Brown, Flight Chief, Child and Youth Services.

## ABOUT

**Kollab Youth** - The Kollab Youth Workforce Development Program is a 501(c)3 public charity organization created for under resourced middle and high school students. Kollab program helps them explore career opportunities in business, STEM and other emerging 21st century careers that are high growth and high wage jobs. Kollab Youth receive mentorship from industry experts and earn resume-worthy work experience through paid apprenticeships and internships connecting them with the future workforce and preparing them to compete in tomorrow's workplace.

**Infini-D Learning** is a collaborative instructional game the whole class plays together that measures each student's knowledge, skills, and dispositions. Students are assessed as they participate in "missions" built around current science and math standards. Each student's computer turns into a futuristic control station where they must gather data, make decisions, and apply their learning to succeed.

Infini-D Learning provides educators with unique technology developed with support from the National Science Foundation. The primary differentiator for the technology is how it comprehensively is able to assess student performance through collaborative and automated simulations that are deployed through the gamified online interface. Each experience follows a detailed narrative tied to core subject content, dynamically adapts to student performance, and produces a detailed report for each participant through regular gameplay.
