

Thank you for your interest in our Directory of Fresh Pet Food Professionals. It's our goal to provide as many qualified resources as possible for the vast number of people seeking nutritionally adequate recipes to feed to their pets. For this reason, our baseline criteria involves the ability for professionals to formulate recipes that adhere to established nutritional guidelines (AAFCO, NRC or FEDIAF) and beyond meeting minimum established nutritional requirements.

We plan to include a summary paragraph and a photo or image in the profiles on the site. Please feel free to submit those to us when you return this form by email.

General Food Philosophy / Feeding Approach:

I think nutrition as a science that has to fit to each individual. I formulate cooked or raw recipe, with or without bones, considering each dog and owner specificity.

Areas of Focus:

I formulate to NRC 2006 standards with a software that has been created by a vet nutrition professor of a french vet school. I don't formulate for pets with diseases because it's forbidden in France when we are not veterinarians.

Experience / Education / Credentials / Apprenticeship/ Training:

I am a vet nurse since 2008. I work here in France with vets who are specialized in nutrition. I learnt a lot on my own by reading the smal animal clinical nutrition and NRC books, and from the vets i work with. I launched my business 1.5 years ago

Continuing Education:

I am a vet nurse, took the CASI course, as well as Cat Lane's courses and the course "anatomy and physiology" from Canine Principles in England. I also learnt from the vets i work with, and I still do. My references are the SACN, NRC, Canine and Feline Nutrition from Linda Case, Fascetti's Applied Clinical Nutrition

Membership in Professional Organizations:

We sadly don't have this in France but we are currently thinking about creating one with the vets i work with

When creating diets, what Nutritional Standards do you formulate to (check all that apply):

- AAFCO 2020
- NRC 2006
- FEDIAF 2020
- Other (Please specify: _____)

What methods, tools, and / of software(s) do you use for formulating:

"Vetnutri" wich is, as I said, created by a nutritionnist veterinarian, professor of a french vet school i work with. It's only for veterinarians initially, but he gave me access to the software. It's built with NRC standards, and with Klein 2019 for growth.
