

Mental Health Disorders leading to Alcoholism

Mental health disorders and depression aren't uncommon among armed service members. Particularly among those who serve abroad, the likelihood of PTSD or related mental health conditions is significantly higher than among the standard population.

Studies suggest that 30 percent of veterans who served in Iraq and Afghanistan may have returned home with mental health issues that put them at a much higher risk for suicide and depression.

Unfortunately, those same service members may not have consistent quality access to care that could successfully address all of their needs.

The G6 Program

A non-profit 501 (C)(3) Corporation,
led by a Military Veteran,
helping Veterans get home safely

Drunk driving and binge drinking among the American veteran/active service member/first responder population has spiked considerably in recent years.

Our mission, is to help them get home safely after these occurrences happen.

We can help save lives of innocent people, veterans, active service members and first responders.

WE GOT YOUR BACK G6

OTHER INFORMATION:

The program is completely funded through private donations and local contributions as opposed to taxpayers money.

We want DUI/DWI arrests to decrease by 50 percent, where Veterans, service members and first responders are involved.

We have set out to save lives among our HEROES that need our help!

HOW IT WORKS

Who qualifies:

Any Veteran, active service member and first responders that drinks at one of the enrolled private facilities/bars and is flagged as intoxicated and no longer able to drive responsibly.

Procedure:

The bar attendant flags the intoxicated person and then schedules a ride home using an electronic device, similar to an Ipad.

The rideshare Uber X car goes to the facility/bar and the intoxicated veteran/active member or first responder gets in the vehicle and the service drives them home.

The G6 Program pays the car service from an account instantly, which is funded by public donations.

The rides must originate at an enrolled facility/bars and riders can only travel within city or town limits of Brick.

Programs Intent:

This program is intended to save veterans, active service members and first responders trying to get home and countless number of calls to emergency control for assistance with traffic accidents related to alcohol.

WHAT WE CAN NOT DO!

Although The G6 Program can not alleviate the veterans/active members and first responders root issues, we will try and get them home safely.
