

VE Gro-Matt

AUSTRALIAN MADE HYDROMULCH (BFM)

VE Gro-Matt is a 100% recycled and bonded wood fibre matrix product, specifically designed for all revegetation and erosion control solutions. The wood fibres comprising VE Gro-Matt are 100% sustainably sourced from recycled and heat treated wood fibres.

When employed in combination with Vital Chemical's nutrient infused Vital Bon-Matt products as tackifiers, the VE Gro-Matt bonded fibre matrix (BFM) creates ideal growing conditions. The result is the delivery of a premium nutrient composition in combination with the VE Gro-Matt's unique water holding capabilities.

VE Gro-Matt employed together with Vital Bon-Matt nutrient infused products provides immediate and superior erosion control whilst establishing a long-term and sustainable growth medium.
