Maintenance:

Periodic inspection of chair and barstool frames should be considered. It is possible over time that high usage or when people are "rocking" frames that they could develop loose joints. The frame should then be taken out of circulation and repaired immediately. Care should be taken when handling chairs and barstools either when moving them, dragging them or placing them upside down. Placement of chairs or barstools in unusually extreme temperature or humidity can affect the wood and finish. Cleaning of exposed wood chair frames should always be done with a soft cloth lightly dampened with a water soluble wood finish cleanser or soap. Never use an abrasive, ammonia or alcohol based cleanser to remove surface dirt as this will make the limited warranty null and void.
