

# ReadyVote® CurbExpress™

**The Dandux® ReadyVote® 41V2020 CurbExpress™** is the functional answer to curbside voting that allows individuals who require voting assistance to use the ES&S ExpressVote to cast their vote from the privacy of their vehicle with a near identical experience as a normal voter. The [CurbExpress™](#) allows for easy movement by a single poll worker from inside to an outside vehicle without lifting or carrying heavy election equipment. Quickly positioned at the vehicles driver, passenger or rear window, the CurbExpress™ eliminated the need for a voter to leave their vehicle.

Large rear wheels make transporting on uneven surfaces like curbs, steps, gravel, or grass possible with minimal effort by a single poll worker. Cantilever design and soft front bumper guard minimize potential vehicle damage.

The CurbExpress™ provides permanent ExpressVote installation while still allowing access for maintenance, onsite repairs and setting the election. The CurbExpress™ can be set for screen heights from 40" to 51". Unique to the CurbExpress™ design is it's nesting feature with allows additional carts to be nested and stored in only 14

41V2020 CurbExpress™
