Cell: 701-426-9210

**K
R**

Hello and welcome to Crosshair Simmental's annual production sale.

The bulls have been fed a complete mixed ration consisting of chopped hay, silage, corn, distillers and a complete mineral program. The average daily gain test started the day of weaning on October 10th and continued for 120 days. All the bulls are semen and soundness evaluated and are ready to go to work for you.

We are excited for you to see the bulls as this is the best set from end to end that we have offered for you to appraise. They are bred to grow and fed to last in anyone's program.

We would like to invite you to take the evening off and join us on April 29 at 5 p.m. at Napoleon Livestock. If you are unable to attend the sale we encourage you to view the bulls at the ranch any time before the sale or give us a call and we can help select a bull to fit your needs and program.

This year we have videos of the offering available online on dvauction.com or our website. We hope to see you at the sale and you can see for yourself how a bull from CHSR can add pounds to your calf crop and improve your profitability. Thank you for your interest and support.

Ben, Cassie, Brinley and Hailey Kleppe

Welcome,

We at Kuhn's Red Angus are celebrating our 22nd year in the Red Angus breed. The Red Angus female is commanding top dollar for her overall functionality in fertility, docility and mothering ability – and these are some of the key points that we at Kuhn's Red Angus strive to breed for!

I would also like to welcome the Hubers into the sale. We are thrilled to have them!

This is one of the finest sets of bulls we have to offer – from birth to growth to carcass, they seem to cover all the bases. We here at Kuhn's Red Angus strive to bring you the best possible genetics by traveling throughout the nation looking for the best out there. We also try to achieve this through artificial insemination. Every female will go through the AI chute. By doing this, we believe we can give you the customer a more complete bull!

Feel free to call or better, stop and look at the bulls and cows. Thank you for your belief and support in our program.

EY

Welcome,

We want to start out by thanking Kuhn's Red Angus and Crosshair Simmental for allowing us to help them "Put the pieces together" for you, the cattleman. This is our 19th year in the Red Angus business and we have been selling bulls since 2007. Our goal remains the same – to breed for balanced traits.

The bulls were fed a ration of hay, alfalfa, silage, hay barley, corn, corn distillers and a beef-developing mineral. The only creep the calves see is a medicated pellet for a couple weeks in the spring before they go to pasture. We feed to protect the body development and longevity of the bulls.

Thanks to all our past customers for trusting in our program, and if we haven't met yet, we look forward to meeting you at the sale. Our cattle are always available for viewing. Feel free to call with any questions.

Bryan, Emmy, Isaac, Alex and Betsy Huber

VOLUME DISCOUNTS AVAILABLE

We will offer volume discounts if you purchase multiple bulls from either Kuhn's Red Angus, Crosshair Simmental or Huber EY Red Angus – 3% discount on three bulls, a 4% discount on four bulls and a 5% discount on five or more bulls. Discount does not apply to a combination of bulls purchased from both.

LIABILITY

All persons attending the sale do so at their own risk. Kuhn's Red Angus, Crosshair Simmental or Huber EY Red Angus assume no liability, legal or otherwise, of any accidents which may occur.

BREEDING GUARANTEE

Kuhn's Red Angus, Crosshair Simmental and Huber EY Red Angus guarantee to provide you with a sound breeding bull capable of passing a semen test at 14 months of age.

If a problem arises, the seller must be notified before Sept. 1, 2016. After notification of issue, seller has 90 days to make an adjustment of said problem. It is the buyer's responsibility to return the bull to the seller at the buyer's expense.

If the bull is declared unsatisfactory, buyer will be provided with a bull of equal value or credit given towards the purchase of another bull, seller's choice.

At no time will seller be responsible for more than the purchase price of animal.

Kuhn's Red Angus, Crosshair Simmental and Huber EY Red Angus will do everything possible to make any problem that arises, satisfactory to buyer.

Kuhn's Red Angus, Crosshair Simmental and Huber EY Red Angus strongly encourage taking insurance on your purchases.

TERMS AND CONDITIONS:

As soon as any animal is sold, it becomes the responsibility of the purchaser. We will discount \$50 per bull taken home by the customer on sale day. After May 1, a \$2.50 per-day feed cost will be charged.

All sales are in the U.S dollar. Each animal is to be sold to the highest bidder. The auctioneer shall settle any disputes as to bids.

All cattle are to be paid for by the purchaser during or immediately after the sale and will not be removed until after settlement has been made unless prior arrangements have been made with Kuhn's Red Angus, Crosshair Simmental or Huber EY Red Angus.

Napoleon Livestock would like the animals removed from their facility as soon as possible.

ONLINE BIDDING:

If you can't attend the sale, real-time bidding and live internet broadcast is available through DVAuction.com. Please see page 2 for instructions on registering and bidding.

15 Head..... Huber EY Red Angus, Jud, ND

Bryan Huber 701-320-8054
Emmy Huber..... 701-320-1995

All heifers are home raised with Red Angus and some Hereford influence in background. The heifers will average between 850 to 900 pounds, and all birthweights are under 100 lbs. They have been selected out of our replacement pen. Heifers are Bangs vaccinated, have a full vaccination program, been poured and checked for breeding soundness. They have had their pre-breeding shot, so they are ready for breeding. They have been feed a high-roughage ration. Call Hubers with any questions.

13 Head..... Bernie and Les Gorman of Adrian, ND

Bernie and Les Gorman 701-685-2223

13 Red Angus/Simmental cross home raised heifers. Heifers have full vaccination and mineral program. They have been poured, Bangs vaccinated, and checked for breeding soundness. Please contact Gormans with any questions.

25 Head..... Jeff and Tanya Schneider, Napoleon, ND

Jeff Schneider 701-226-6685

25 Red Angus-cross heifer. They have had all their calthood vaccinations, both strains of pinkeye shots and have been Bangs vaccinated. They have had their Preguard shot and are on complete mineral program They are checked open and breedable, weighing 750 to 800 lbs. Contact Jeff Schneider for more information.

12 Head.....Kuhn's Red Angus, Napoleon, ND

James Kuhn 701-426-6921

12 Commercial Red Angus heifers out of the heart of are replacement pen. The heifers have been Bangs vaccinated and through a full vaccination program. In addition, also checked for breeding soundness and they will have their pre-breeding shot and ready for breeding. The heifer's average birthweight is 81 lbs, and weening weight averaged 623. They will weigh between 875 to 925 lbs. Call James Kuhn with questions.

We bought Perspective to add calving ease and maternal to our program. We are now through our second calf crop using him on our registered heifers and only have assisted one birth. He is a tremendous calving-ease herdsire with above-average growth and is a cherry red color. We feel Perspective is a must-use in any heifer program or to add depth, calving ease and maternal into your cowherd. Semen available through Crosshair Simmental or C Diamond Simmental.

Gladiator was our pick and high seller of the Kopp Farms sale in Canada. We were looking for an outcross herdsire and found that and much more with Gladiator. He is cherry red and as thick as you can make one. He stamps his calves with big, deep rear ends and nice small heads. His dam was one of their very best cows who also has two sons that are herdsires in registered herds in Canada. Use his sons to add depth and thickness to any set of cows, and we expect the daughters to be great. Semen available.

Formulated is a bull we purchased from Kemmer Simmentals. He adds muscle and thickness in a moderate frame. His daughters are deep, good-uddered, productive females.

Simmental Guide to EPDs

Courtesy of the America Simmental Association. For more information on EPDs, visit simmental.org.

CE Calving Ease – predicts the ease with which a bull’s calves are born to first-calf heifers or mature cows. Larger number indicates higher percentage of unassisted births for calves sired by this bull.

BW..... Birth Weight – predicts the difference in average birth weight of a bull’s progeny compared to other bulls.

WW Weaning Weight – predicts the difference in average 205-day weight of a bull’s progeny.

YW..... Yearling Weight – predicts the difference in average 365-day weight of a bull’s progeny compared to other bulls.

MCE Maternal Calving Ease – The ease with which a sire’s daughters calve as first-calf heifers or mature cows. Larger number indicates higher percentage of unassisted births for calves born out of this sire’s daughters.

Milk Milk – predicts the milking ability of a bull’s daughter. A positive value indicates above average milking ability.

MWW Maternal Weaning Weight – predicts the weaning weight of a bull’s daughter’s calves in pounds. A positive value indicates higher-than-average weaning weights.

CW..... Carcass Weight – predicts the difference in average hot carcass weight. A positive number indicates heavier-than-average carcass weights.

REA Ribeye Area – predicts the average difference in ribeye area between the 12th and 13th rib of an animal’s progeny. Express in sq. inches.

MARB .. Marbling Score – A subjective evaluation of the amount and distribution of intramuscular fat (IMF) measured between the 12th and 13th rib. A positive value indicates higher-than-average marbling.

BF or FAT Backfat – predicts the average differences between an animal’s progeny in external fat thickness at the 12th and 13th rib. Express in inches at a given age endpoint.

YG Yield Grade – predicts the average differences in cutability and is expressed as a deviation. A negative or lower value is desirable just as a lower Yield Grade is desirable.

STAY Stayability – predicts the probability that a sire’s daughters entering the herd will stay in production through 6 years of age. A higher value indicates greater stayability.

API All-Purpose Index – Evaluates sires for use on the entire cow herd with a portion of their daughters required to maintain herd size and the remaining progeny put on feed.

TI Terminal Index – Evaluates sires for use on mature Angus cows with all offspring put on feed. Maternal traits are not considered in this index.

SIMMENTAL Power of Science.

Commitment to the Beef Industry.

Committed to data collection and performance-enhancing programs to provide better tools for beef producers.

Focused on science and research to continue advancing technology.

The Most Profitable Calf is the Crossbred Calf.

SimAngus™ The Obvious Choice.

"Crossbred steers with a **50:50 ratio of Continental European to British breed** inheritance are likely to produce a more optimum balance between carcass **quality grade** and **yield grade** than crossbred or straightbred steers that represent either 100% British breed, or 100% Continental European breeding."

Generating Value Through Genetic Progress

TOP DOLLAR ANGUS®

Now adding value to both Angus and **Red Angus** feeder calves

Capture premiums by giving your calves the name recognition they deserve!

Should you consider Top Dollar Angus certification for your calves? Absolutely – YES!

If you've consistently invested in high-performing Angus or Red Angus genetics, we can make your calf crop stand out from the pack, and give you access to the Top Dollar Angus premium calf-buyer network, regardless of how you market your cattle (local auction, video, or direct trade). Our goal is to bring more demand to your doorstep.

Moving ahead in 2016, the beef cattle business offers both challenges and opportunities. Lower feeder calf prices underscore the need to capture value-added premiums. Every cow-calf producer with high-end genetics and a solid health program wants to sell their cattle above the average market price, which is exactly why Top Dollar Angus was created.

Top Dollar Angus is a genetic certification and marketing company focused exclusively on the best Angus and Red Angus-influenced feeder calves in the industry. Qualified calves must contain at least two generations of Angus or Red Angus genetics with growth and carcass traits ranking in the top 25% of their respective breed.

Red Angus sires that have a GridMaster Index in the top 25% of the breed or higher meet Top Dollar Angus specifications. Look for the Top Dollar Angus designation on sale lots in this catalog!

This new program is similar to Certified Angus Beef®, except that Top Dollar Angus does its "branding" in the feeder cattle and calf market. It works by certifying calf crops that meet program requirements on the farm or ranch, enabling these cattle to be marketed using the Top Dollar Angus brand name and logo. Top Dollar Angus feeder calves are eligible to receive a \$50 per head premium (sometimes more) over the average market when sold to partner feedyards. One group of Top Dollar Angus steers sold recently via video auction

for \$67 per head above the average market for their weight and location. Another group was forward-sold for a \$52 per head premium. Yet another single load of Montana steer calves beat the market by \$57 per head.

Why are so many profit-minded cattle feeders interested in purchasing Top Dollar Angus calves and yearlings? It's because these cattle perform very well both in the feedyard and on value-based grids. Top Dollar Angus cattle consistently deliver rapid growth and high quality grades. That puts extra dollars in cattle feeders' pockets, which are passed back to cow-calf producers in the form of premium prices.

Red Angus Guide to EPDs

HB HerdBuilder Index – Need bulls for developing a profitable cowherd and maximizing the value of marketed progeny? Select a bull with a high HB value.

GM GridMaster Index – If you market all of your calf crop and want to increase the value of that calf crop, select a bull with a high GM value to maximize your profit.

CED Calving Ease Direct – Breeding Heifers? Select bulls with a high CED to increase the probability that the heifers will calve unassisted.

BW..... Birth Weight – Predicts differences in birth weight. BW is included in the CED EPD, so simplify your decisions by selecting bulls based on CED instead of BW.

WW Weaning Weight and **YW** Yearling Weight – Predicts differences in weight at weaning and yearling. While selection based on these growth measures can increase your payweight, be cautious what the bull's other EPDs are.

Milk Milk – Predicts differences in weaning weight of daughter's progeny due to milk production.

ME Maintenance Energy – Selecting bulls with a lower ME EPD will decrease the amount of feed his daughters will require to maintain body weight.

HPG..... Heifer Pregnancy – Retaining heifers? Select bulls with a high HPG to increase the percentage of exposures that result in a calving observation.

CEM Calving Ease Maternal – Another number to pay attention to if you are retaining heifers. Selecting bulls with a high CEM will increase the probability of those daughters calving unassisted.

STAY.... Stayability – The most important trait if your goal is developing cows that stay productive, thus increasing your profitability. Bulls with a high Stay EPD are expected to sire daughters that remain productive in the herd until at least 6 years of age.

MARB .. Marbling Score – Select bulls with high MARB EPD to increase the number of progeny that grade Choice or Prime.

YG Yield Grade – Marketing calves on a grid? Placing selection pressure on YG EPD will decrease the number of YG discounts on grid-marketed progeny.

CW..... Carcass Weight – Selecting bulls with a high CW EPD will increase the weight of the hanging carcass, which directly impacts revenue.

REA Rib Eye Area – Need to add muscle? Select bulls with a high REA EPD to increase rib eye area, which favorably increases Yield Grade.

FAT Backfat – Need to reduce waste in carcasses? Select bulls with a low FAT EPD to reduce backfat, which favorably increases Yield Grade.

For more information on EPDs, visit redangus.org.

Ranch Tested. Rancher Trusted.

- Dam's weight: 1545
- Scrotal: 35
- Don't know how to say it but I really like this cow, so keep the daughters!

Buy a Bull – We'll Buy Your Tags!

If you purchase a bull from us, we will purchase one bag of FCCP or Allied Access tags per bull for you. All you need to do is call the Red Angus Marketing Department, answer a few management questions, and enroll your calf crop for free. Then start reaping the premiums through Red Angus' marketing programs!

Feeder Calf Certification Program (FCCP) "yellow tags" are for bull customers using ONLY Red Angus bulls. FCCP cattle are accepted into the Choice+ Grid and Pro-Cow Program. Cattle enrolled in FCCP are USDA genetic, source and age verified.

Allied Access "green tags" verify source and age for bull customers utilizing halfblood bulls in their planned crossbreeding program.

Red Angus Feeder Calf Certification Program

For over two decades the FCCP has been delivering results for bull customers using ONLY Red Angus bulls.

Genetic, Source & Age

Released in 2012, Allied Access provides an added-value option for Red Angus customers using multiple breeds in a rotation, hybrids and/or composite bulls to capture heterosis in their crossbreeding programs.

Source & Age
