

Masterstroke X-stream counter-current system

Energise your senses.....

Masterstroke brings Fitness, Relaxation and Well-Being into your lives and homes with our counter current systems.

Masterstroke X-stream counter current systems are UK manufactured units with stainless steel face plates and fittings giving a high quality finish to the unit which can be installed in concrete, lined or panel swimming pools. These highly efficient counter current systems can be custom-made for each pool. A choice of four models caters for the recreational swimmer to the elite athlete.

Flows of up to 75m³/hr can be created with the MX75 making this unit suitable for the recreational/intermediate swimmer.

For the competitive sportsman or sportswoman, the MX140 will offer a challenge allowing the swimmer to train for competition with flow rates of up to 140m³/hr.

All units come complete with plumb kit and pneumatic control box ready for installation.
