

PRESS NOTE

SulGas Mumbai 2024 - Successful Sixth Edition of Sulphur Recovery & Gas Treating Conference

Mumbai, India: The 6th edition of SulGas®, organized by Three Ten Initiative Technologies LLP, took place from January 31 to February 2, 2024, at Novotel Juhu, Mumbai. The event brought together public-sector oil companies, private refiners, petrochemical, chemical, and fertilizer plants, licensors, engineering companies, solvent and column equipment manufacturers, as well as control and instrumentation companies. SulGas 2024, advised by experts from various sectors of the sulphur and gas processing sphere, received extensive support from Indian and foreign industry associations and media houses.

The event saw participation from over 155 attendees, representing more than 68 companies with notable end-users such as BPCL, ExxonMobil, HMEL, HPCL, IOCL, MRPL, Nayara, Petronas, and RIL among the participants.

SulGas 2024 provided an ideal opportunity for experts to engage with their peers, share best practices and troubleshooting tips, and discuss advanced technologies and operating procedures with technology providers, vendors, and licensors. The conference featured 33 speakers in interactive technical sessions, fostering maximum technical exchanges among participants. Additionally, a dedicated exhibition area with full-day access for all delegates was made available.

The opening keynote of the 6th edition was delivered by Mr. S. Bharathan, Director (Refineries) of HPCL, setting the tone for the conference. There were ten sessions that covered a broad range of topics including decarbonization & carbon capture, enhancing SRU capacity & recovery, advances in SRU instrumentation, simulation, and control, SRU waste heat boilers, gas processing, operational challenges with SRUs, emission reduction and decarbonization, and tail gas treating. Another unique aspect of the meeting was a panel discussion at the end of each session with open Q&A.

The seventh edition of the SulGas conference is scheduled to take place in Mumbai from February 5 to 7, 2025.

310i Technologies (www.the310i.com), based in Visakhapatnam, India is a global provider of services including advanced process control, custom engineering software, simulation and custom modeling; software products – ProTreat®, SulphurPro®, and ProBot™ (all for gas treating and sulphur recovery); specialized technical conferences – SulGas (www.sulgasconference.com), Distillation Experts Conclave (www.distillationconclave.com) and SAFETEMBER (www.safetember.in), senior level training in process safety, controller performance monitoring, process loop tuning, distillation in practice, sulphur recovery (including TGTU), gas treating (amine, sour water stripping, and CO2 removal); and young engineer training (under the SkillNXT Programs) in piping & instrumentation diagrams, building custom applications (Excel/VBA), process simulation basics, engineering economics, professional communication and ethics. Contact info@the310i.com for details.
