QUICK SERVICE POS SYSTEM
Focus on the customer, not the computer

SPEED, ACCURACY AND RELIABILITY

Restaurant Manager's Quick Service POS System (QSR) is comprehensive POS software that helps you increase revenue, decrease costs and improve efficiencies. It focuses on critical business issues facing today's restaurant owner. With Restaurant Manager, you get robust operational functionality, and the information needed to solve real business issues and ensure return business.

BUSINESSES WHO USE THIS POS SOFTWARE BENEFIT FROM:

- **Operational Flexibility** – Large, colorful screen buttons can be easily programmed with Restaurant Manager. This makes it easy for servers to fill customer orders quickly and sends instant, accurate and legible information to the food prep staff.

- **Quickly Trained Employees** – Intuitive software interface means new employees can easily get up-to-speed, which is important in this high-labor turnover industry.

- **Customer-Focused Functions** – Flexible ordering options allow customers to place special orders without slowing down the ordering time. Automatically tracks orders to group eligible 'combo' items together.

- **Increased Sales Options** – Delivery and take-out capabilities provide restaurants with operational, management and reporting features. These features manage additional sales options that increase business opportunities.

- **Print/Display for Food Prep** – Make fewer kitchen errors and improve customer satisfaction with features such as "updated item" banner alerts and displaying the quantity for modifiers.

- **Back Office Reporting** – Robust and flexible reporting helps you make better business decisions. Improve management with these reports and stay in compliance with local regulators.

QUICK SERVICE POS SYSTEM

Focus on the customer, not the computer

Enhance your Quick Service POS System with these value-added services:

Promotions & Coupons

- Complete POS control of powerful marketing to reach out and extend a bar or nightclubs customer base

Customer Loyalty

- Promotes special offers to customers and tracks the way they earn and redeem points for their purchases

Coin Dispensers

- Speed up service and allow for easy cash management

Gift Cards

- Increase your sales and expand market reach to web-based or in-store

Kitchen Display Monitors

- Paperless, accurate management of customer orders on the kitchen line with complete performance metric

Inventory Control & Stock Counters

- Comprehensive or simple management of inventory resources

SkyTab Pay-at-the-Table

- Utilize EMV chip technology with point-to-point encryption to ensure payment data is protected
- Collect customer email addresses to populate your marketing database and increase repeat business
- Prompt customers to rate their experience and alert management when a patron isn't satisfied, avoiding negative Yelp reviews
- Allow delivery drivers to collect payment at the door with built-in 4G SIM card

Order Confirmation Display

- Ensures accurate orders, increased order throughput and customer satisfaction

Online Ordering

- Gives customers the convenience they want while managing your entire menu from one place

Guest Paging

- Reduce wait times
- Maintain a quieter atmosphere by eliminating the need for an overhead PA system
- Locate guests more quickly
