

## TABLESIDE ORDERING

*Improve the ordering process with Restaurant Manager Tableside!*

### GET YOUR 30 DAY FREE TRIAL OF RM TABLESIDE ORDERING TODAY!

Full tableside ordering is now available for Restaurant Manager POS customers! RM Tableside Ordering\* provides the full functionality of a Restaurant Manager workstation along with EMV and MSR for Pay-at-the-Table. The tablet application mirrors the interface of the actual POS software. This allows servers to send orders to the kitchen or bar, resulting in a huge increase in efficiency. The best part? RM Tableside Ordering, which is all inclusive with hardware and software, comes with a lifetime warranty!

### BUSINESSES WHO USE TABLESIDE + PAY-AT-THE-TABLE BENEFIT FROM:

- **Increased operational efficiency** – Serve customers and turn tables faster by eliminating the need for your servers to walk back and forth to the POS system. Seamlessly integrated with your Point of Sale (POS) software, you can easily place orders as items are requested.
- **Improved customer service.** – Servers will make more money by turning more tables and earning bigger tips as average checks typically go up. Patrons will feel safe because their credit card never leaves their sight.
- **Eliminated mistakes associated with handwritten orders** – You'll have more accurate ordering that results in less wasted food.
- **Accept multiple types of payments** – RM Tableside Ordering can accept EMV and swiped card payments, with the added benefit of Point-to-Point Encryption (P2PE) and Tokenization for maximum security.
- **Fully integrated** – RM Tableside Ordering is compatible with Restaurant Manager POS Systems as well as our back-end Lighthouse Business Management System (reporting portal).

\*Must process with RM Payments to receive RM Tableside Ordering.
