

South Wonston Sustainability's mission is to encourage and support our community to evolve towards a climate friendly, smarter and more sustainable way of living.

Goals:

1. Liaise, learn and connect with other individuals, organisations and groups in our community to enable positive changes to reduce our impact on the environment.
2. Reduce waste and consumption as a community, by refusing, reducing, reusing, repairing and recycling.

Values:

1. To respect each other with our thoughts, behaviour and language: everyone's voice is important.
2. To be kind and take care of one another, the community we live in and the environment.
3. To be open to new ideas and suggestions; adopting a non judgemental stance.
