In an exemplar PCN our service provides care for:

- 48% of children 0-5yrs
- 25% 6-11 years and
- 25% 12 – 16 years

**Savings achieved when 30-40% population coverage is achieved**

**100%**

Of patients are supported with health promotion, education, and self-management information

**Equity**

Children with the greatest needs get early intervention and the care they need through a data-driven approach to proportionate universalism.

Improved urgent and emergency health service use for children with everyday paediatric conditions:

- **13.8% reduction in ED contacts**
- **6.8% reduction in non-elective admissions**

Improved urgent and emergency health service use for children with long term conditions:

- **49% reduction in ED contacts**
- **45% reduction in non-elective admissions**
