

Sponsorship Package 2024

Inspire the next generation of skilled workers with us.

The Team

2024

Each of our journeys in the trades is unique. We want to explore new and exciting ways to share our passion for the skilled trades, while connecting with the younger generations within our communities to engage them with hands on activities that teach and encouraging them to explore opportunities within the trades.

Community Cupboard

2024

CUTTING MATERIAL

Our first step of this project was to design, estimate, and gather all our materials. Soon after we started cutting and slowly getting our puzzle pieces for the community cupboard.

GETTING READY TO ASSEMBLE

Once we finished cutting every piece, we made sure they all fit together! We had the assistance of Paul Roberts, the owner of Campbell Timber and Stone, to help with the woodworking.

ASSEMBLY

This part went smoothly, thanks to the various skilled trade workers we have on our team. It was relatively easy to assemble, with only a few bumps along the way.

GRAND REVEAL

Wow! The feeling is truly indescribable. Knowing that those in need now have a place to access essential supplies warms the heart. I'm looking forward to creating more projects like this in the future.

Fall Frenzie Workshops

2024

Previously sponsored by : United Way BC , Catcoin, Caring Cats, and Briggs Solutions

COPPER IPAD/BOOKSTANDS

Creating a copper iPad stand not only results in a stylish accessory but also develops crucial life skills, including precision in measurement, problem-solving, and attention to detail.

Thank you United Way, Catcoin, and Caring Cats for funding this workshop.

STRING ART

String art is a creative and meditative project using a wooden board, nails, and colorful yarn. Outline a design, hammer the nails, and weave yarn to form different images. This visually striking activity fosters spatial awareness, patience, and artistic expression, resulting in unique and decorative pieces.

DRYWALL 101

Installing drywall is a hands-on project that enhances precision and confidence. We wanted to offer more skill based projects for adults that they could use in their everyday life.

Thank you Briggs Solutions for donating material.

COPPER REINDEER

Our copper reindeer event was a family event. While adults had the chance to test their skills. The kids were busy making cookies and shortly rushing to help their parents build their reindeer

Sponsorship Opportunities
