HARDWOOD PLYWOOD**

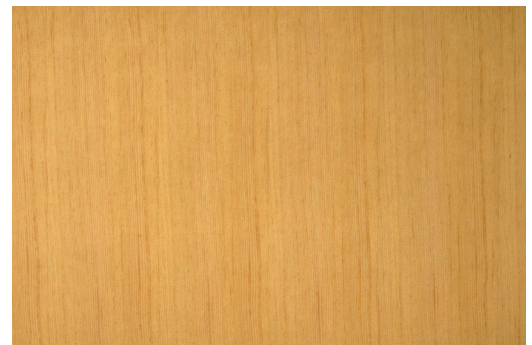

ASH

Ash plywood is a type of engineered wood product made from thin layers of ash veneer, stacked and bonded together to create a strong and versatile material for various woodworking and construction applications.

BIRCH

Birch plywood is a popular plywood variety known for its strength, smooth surface, and attractive light-colored wood grain, making it a preferred choice for furniture and cabinet making.

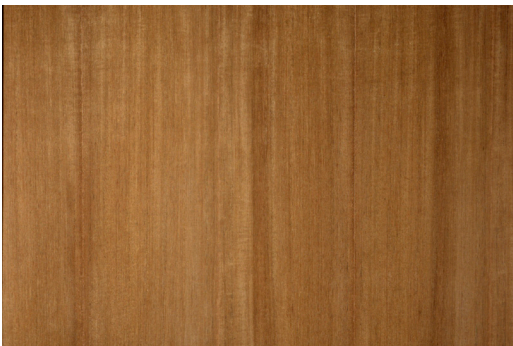

FIR

Fir plywood is a durable and cost-effective plywood option, often used in structural and construction applications due to its strength and resistance to warping.

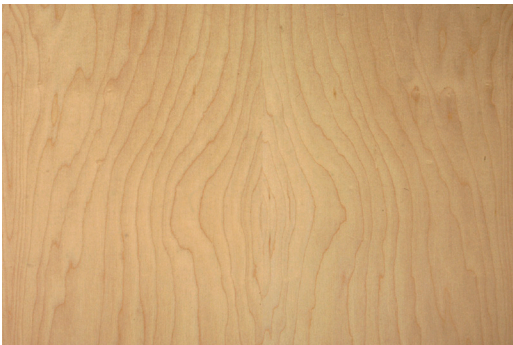

KNOTTY ALDER

Knotty Alder plywood features a rustic charm, making it a versatile choice for achieving a warm and natural look in woodworking projects.

MAHOGANY

Mahogany plywood is prized for its rich, reddish-brown hue and fine grain patterns, making it a luxurious choice for high-end furniture and interior finishes.

MAPLE

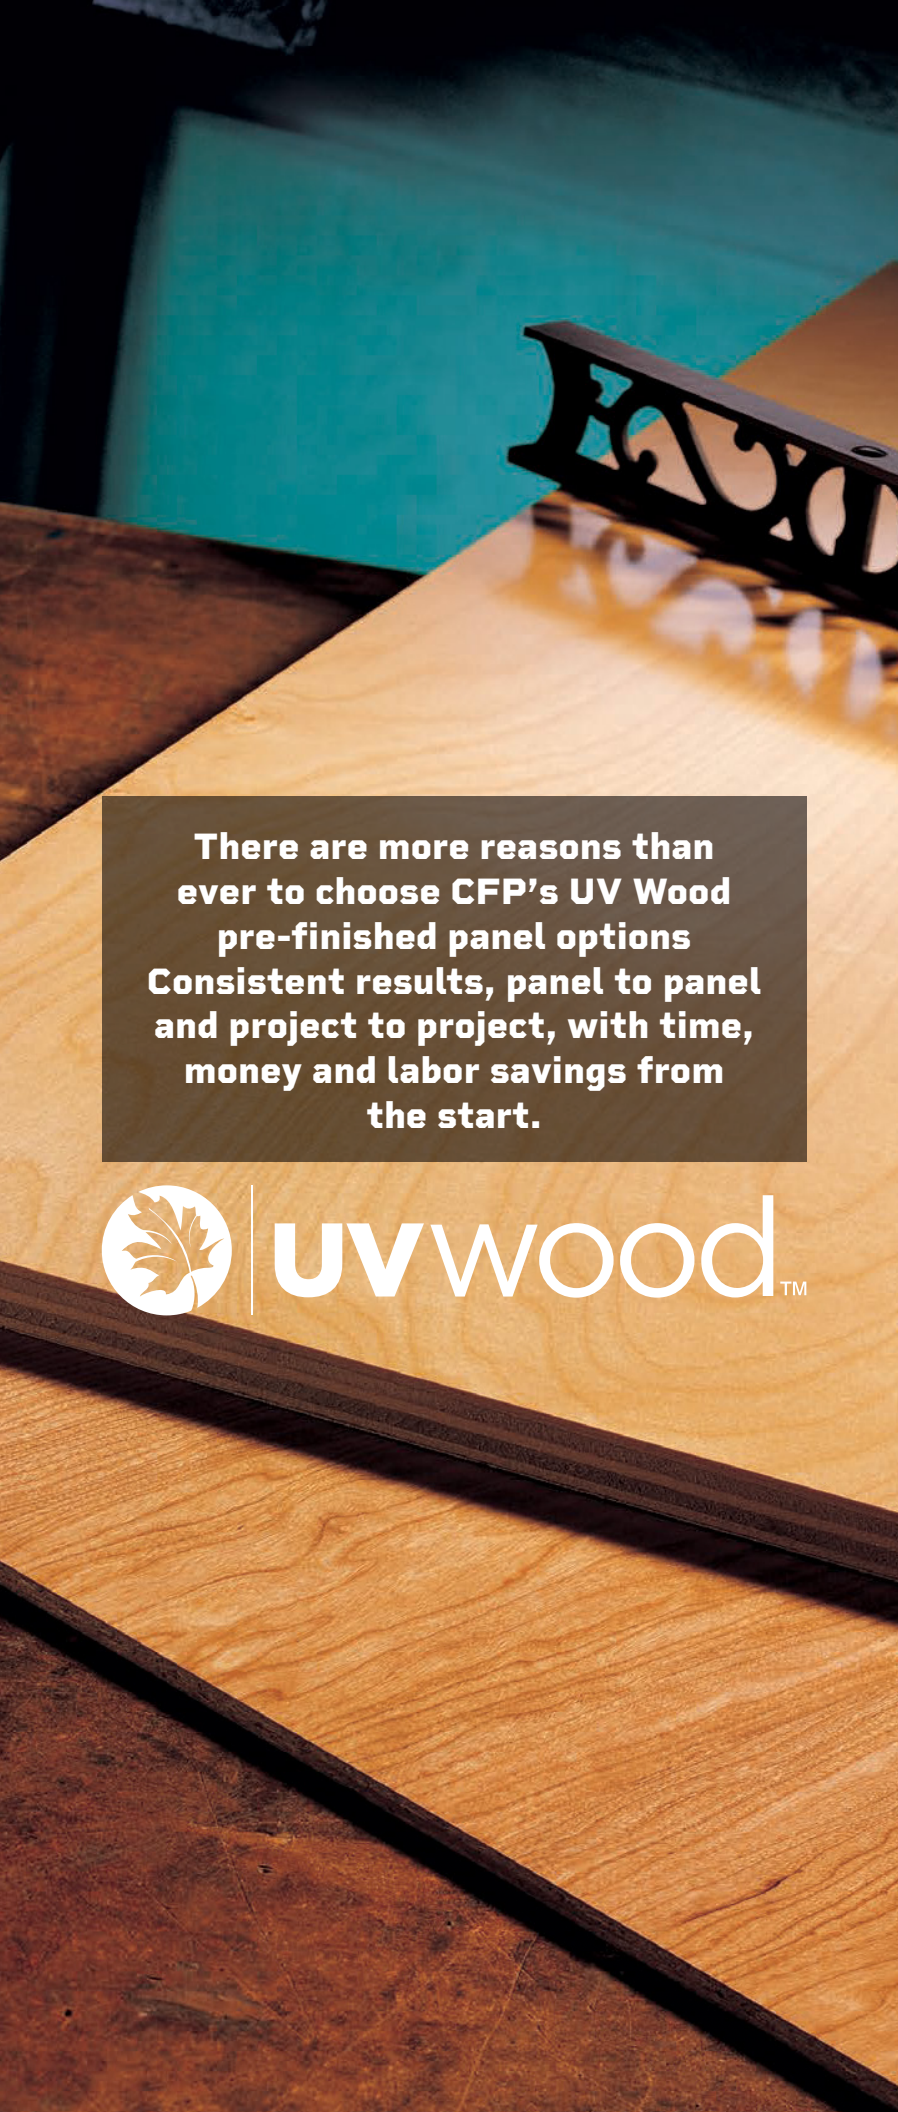

Maple plywood is a versatile choice, known for its light, uniform color, and smooth grain, making it ideal for a wide range of woodworking projects, from cabinets to musical instruments.

This veneer core plywood panel features Meinan®- peeled hardwood crossbands under the decorative face and back, to introduce a new standard in all-wood veneer core panel surface quality. It reduces telegraphing, making MPX better for finishing and applications where a smooth, even face is desired. Of course, standard construction includes soy-based PureBond® formaldehyde-free technology.

MPX[®]

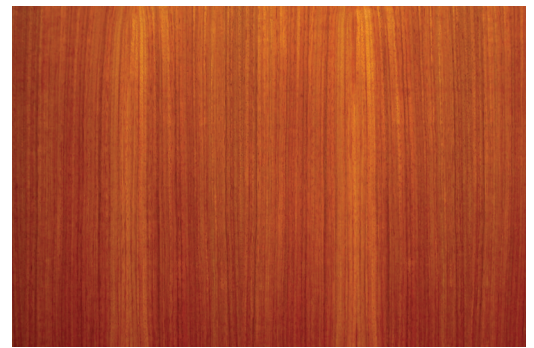

Smooth, Domestic, All-Wood Core

There are more reasons than ever to choose CFP's UV Wood pre-finished panel options. Consistent results, panel to panel and project to project, with time, money and labor savings from the start.

PADAUK

With its distinctive reddish-orange hue and interlocking grain, Padauk plywood adds a bold and exotic touch to woodworking projects, often sought after for decorative and artistic applications.

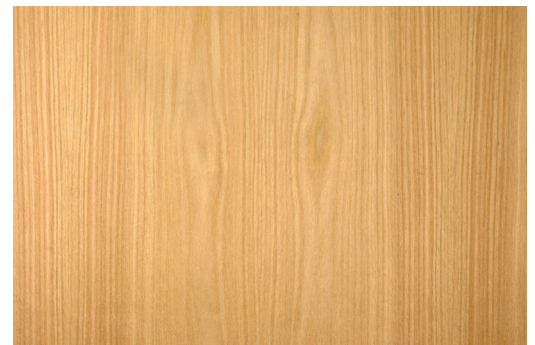

Available as a special order.

POPLAR

Poplar plywood is a lightweight and economical option, favored for its ease of machining and painting, commonly used in applications like cabinetry and interior paneling.

Available as a special order.

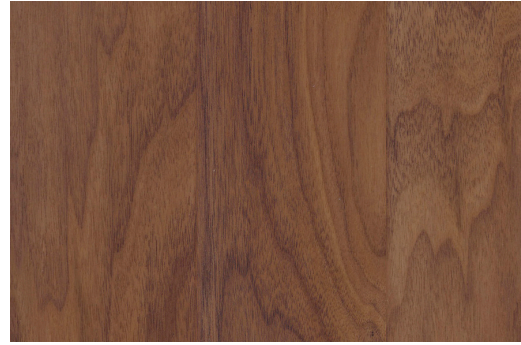

RED OAK

Red Oak plywood, characterized by its strong grain patterns and warm reddish-brown color, is a classic choice for traditional woodworking projects, including furniture and architectural elements.

WHITE OAK

White Oak plywood offers the strength and elegance of white oak wood, making it a preferred choice for high-quality furniture, cabinetry, and interior finishes.

WALNUT

Walnut plywood, prized for its rich dark brown color and distinctive grain, imparts a sense of luxury and sophistication to fine woodworking projects like cabinets and high-end furniture.

Introducing Columbia's New UV LabCoat™

Pre-finished hardwood plywood with a premium topcoat that offers even more depth, clarity, and durability than our standard UV offering. It is compliant with the Scientific Equipment and Furniture Association (SEFA™), enabling it to be used in labs, schools, institutions and other commercial installations that require the chemical resistance of a laboratory grade finish. Combined with our PureBond® formaldehyde-free hardwood plywood technology, UV LabCoat panels will enhance and improve your next project, meeting the highest standards for appearance, performance and indoor air quality.
