IT Specialist

Xcitium Managed Security Solutions

PREVENTION

ZERODWELL CONTAINMENT

Protect against execution of all unknown threats with patented isolation technology

VISIBILITY

ENDPOINT DETECTION & RESPONSE (EDR)

Gain complete visibility across your endpoints and network to provide root cause storyline enrichment

PROTECTION

ADVANCED ENDPOINT PROTECTION (AEP/EPP)

Protect your endpoints with Anti-Virus, HIPS, Firewall, NGAV, + ZeroDwell Containment

REMEDIATION

ENDPOINT MANAGER

Attack surface reduction with patch management and remote remediation

MANAGED

MANAGED DETECTION & RESPONSE (MDR)

Fully managed service providing people, process, and technology

ZERO
DWELL

ZeroDwell-Containment technology **identifies known and unknown threats real-time** without needing to rely on detection, then neutralized in virtualization sessions that prevent access to critical assets and resources.

ZERO
DOWNTIME

Zero Threat is quickly deployed. It won't heavily impact endpoint performance. End users **enjoy seamless productivity**, with the ability to run any unknown file virtually, even while the file is in analysis.

ZERO
DAMAGE

Kernel-level virtualization **ushers unknown, undetectable threats straight into isolation** where any malicious file or code can reveal itself without any possibility of damage to the endpoint or the business.

ZERO
BREACHES

Zero-breach track record when fully configured. Includes unlimited, no retainer Incidence Response (IR), plus a **$1 million warranty** on MDR and XDR services.

IT Specialist Advisory Services is a premier partner with Xcitium and can assist in the acquisition of both EDR and advanced managed detection and response offered by the managed services provider. We make it simple!
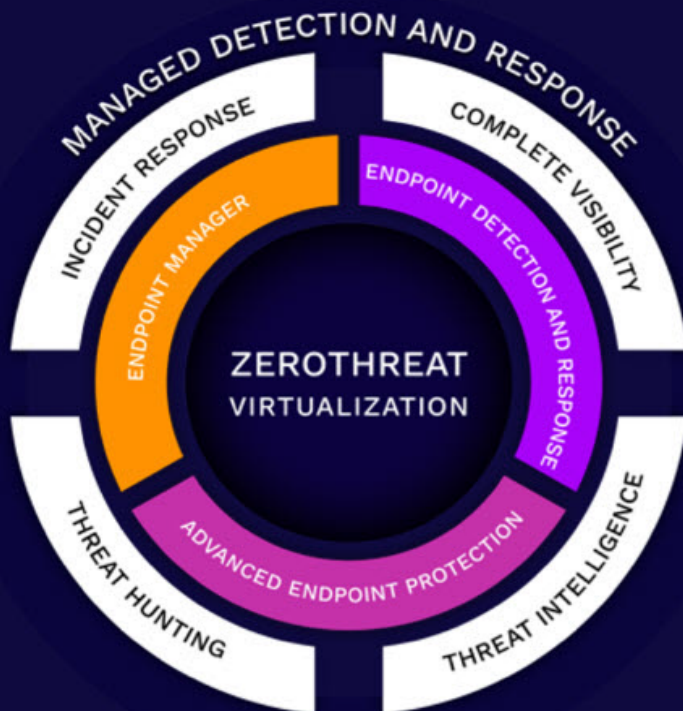

Why Xcitium?

6,000+
