

McKee in action.

MONTEGO

ARUBA

This family craft features dual fiberglass consoles, walk-thru windshield, center flap and bow and stern lights.

The 14-foot story in 6 versions.

All these 14' models have the same tough fiberglass hull. The 68" beam means plenty of room for comfort, convenience and versatility. They're great for one-man sport or family fun. All have mechanical steering and running lights, 505 lb. maximum persons capacity, 890 lb. maximum weight capacity and are 70 hp rated. Aruba and Angler weigh 700 lbs. Other models, 630 lbs.

565 lb. max. wt. capacity

Short Shaft Transom: 330 lb. max. person capacity,
530 lb. max. wt. capacity

WITHOUT STEERING

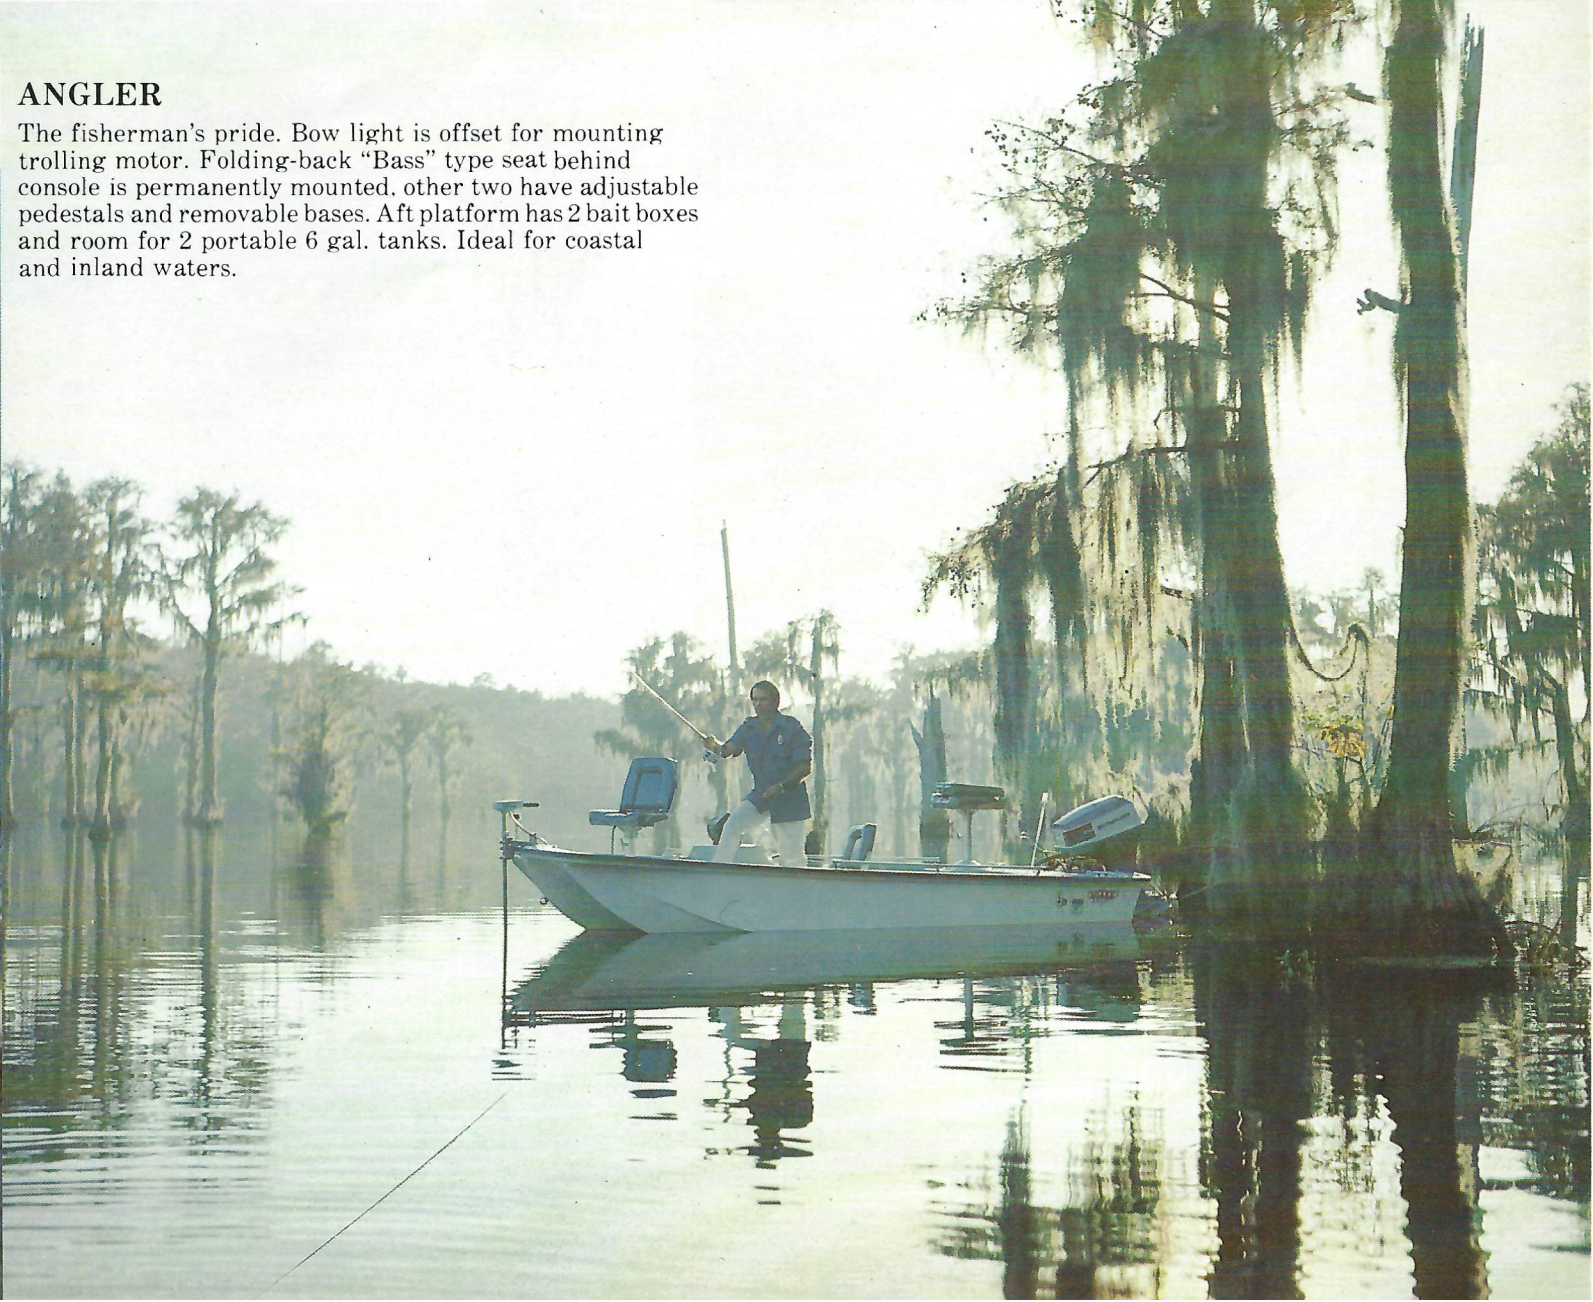

WITH STEERING

ANGLER

The fisherman's pride. Bow light is offset for mounting trolling motor. Folding-back "Bass" type seat behind console is permanently mounted, other two have adjustable pedestals and removable bases. Aft platform has 2 bait boxes and room for 2 portable 6 gal. tanks. Ideal for coastal and inland waters.

Where toughness counts.

20' Breakers.

Who uses McKee Crafts?

McKee Crafts are, of course, great family fun, fishing and sports boats. McKee Crafts are also well-known in business, industry and government for their durability, reliability and performance. Prominent users of McKee Crafts include the Federal Government, the U.S. Coast Guard, state governments, archeological and marine survey organizations, num-

17' Offshoreman

erous universities and colleges, the St. Lawrence Seaway Development Corp., major oil companies, commercial fishermen as well as other industrial and commercial businesses. In addition to pleasure boating, McKee Crafts are used for work on aids-to-navigation, as patrol and life boats, as personnel ferry boats and in law enforcement and rescue work.

This is an actual 14' McKee craft.

The Unsinkables!

Safety is built into every McKee Craft. McKee Craft includes heavy duty full foam flotation from gunwale to gunwale as standard equipment on all models. A McKee Craft will stay afloat even if split in half. Wrap-around flotation gives added strength to the already sturdy, double-hulled McKee Craft design.

Cathedral Hull

McKee Craft's cathedral hull design actually gives you one of the safest and most comfortable rides possible. Outer keels give flat, no-slip turns with unbelievable stability. The high performance hull is sure-footed and responsive even in heavy seas.

Every new McKee Craft is certified by the Boating Industry Association and meets the requirements of the U.S. Coast Guard regarding load and horsepower capacity, level flotation, navigation lights, steering and compartment ventilation.
