# PetBONE

## PetBONE 沛骨素

Various human and animal tests have confirmed the exclusive raw material [strontium citrate] and has practical benefits for bone and articular cartilage.

◆ With the new formula, it can help the hairy child's joints lubricate, supplement more bone nutrition, increase bone mobility, maintain stable and healthy joints, and have a healthier life.

Dedicated to providing special nutritional supplements exclusively for pets.

### Preventive medicine

- Enhance the strength of oral alveolar bone and body bones early
- Extend the life of bone and teeth
- Strengthening bones, maintaining flexibility, and slowing aging

### Postoperative medicine

- Increase osteoblast, accelerate recovery, and shorten treatment
- Dental bone, bones, joints, triple recovery treatment effect
- Reducing pain and improving mobility

all-round

### Application objects : Dogs and cats of all ages

Applicable to osteoarthritis, due to the factors like the lack of nutrition of bones, aging, obesity, congenital genetic defects, injury, and the lack of nutrition, factors like these causing damage to the bones and cartilage, friction on the hard bones, loss of joint support and reducing cushioning flexibility, which can lead to injury to the pet.

Help dogs and cats make early lifestyle adjustments and supplement their diet to slow down joint aging!

Joint Bone

PetBONE

- Proved by a variety of human subjects and animal tests, our exclusive material, **[Strontium Citrate]**, has actual benefits for bone, and articular cartilage.
- With a new formula to help lubricate your pet's joints, provide nutritional supplements for bones, increase bone mobility, maintain stable and healthy joints, and lead a healthier life.

Exclusive formula for joints and bones

### Strontium Citrate

Promotes the generation of osteoblasts, bone regeneration, and calcium absorption, and reduces the loss of bone and the loss of cartilage tissue.

### MSM

A rich sulfur compound, it benefits reducing uncomfortable feelings. It can maintain and helps provide comfort for pets' mobility.

### B.C. Kolla2®

As the main ingredient of joint cartilage, it can maintain the complete structure of the protein, enhances mobility, and makes the pets more flexible.

### Vit-C

Maintenances joint capsule, lubricating fluid, cartilage, and other connective tissues. Promotes collagen absorption and synthesis.

Actual cases used by veterinarian

### British Shorthair 3y

Before

After

After one month of taking the medicine for osteonecrosis, the shape of the femoral neck gradually became normal.

### Poodle 12y9m

Before

After

After one month of taking it, osteophytes shrank and bone density increased.

Weight	10kg ↓	11~20 kg	21kg ↑
Number of capsules (daily)	1 capsule	2 capsules	3 capsules

Direction:  
Consume daily. Directly feed your pets or pull the capsule apart and mix the powder with food or water.

+Flexibility of joints

+Improve mobility.  
+Enhance the support ability of bone.

## Pet Health Supplement

### SGS Pass Tests Reports

- ✓ Enteropathogenic Escherichia coli-free

## Pet Health Testing Kit

## Kidney Disease: The Silent Killer

1 in 285 dogs are diagnosed with kidney disease

About 1 in 43 cats are diagnosed with kidney disease

Any condition which damages the kidneys is referred to as kidney or renal disease. In some cases, dogs (or cats) may show early warning signs of kidney disease. However, signs of serious illness only appear after **75% of the kidneys' function** has already been lost. This is the reason why **early detection** is so important, especially for dogs (or cats) age 7 or older. A simple blood test and urinalysis are all that is required to detect kidney disease.

The kidneys can be damaged by a wide range of conditions including injury, infection, toxins, and cancer. This damage is usually irreversible. Kidney disease is common in dogs (or cats), but **with early diagnosis and treatment, progression can be limited** and many dogs (or cats) go on to live happily for years after diagnosis.

## Why Home Care?

Pet Health  
Testing Kit

Many of the conditions that we see are correctable, often by dietary changes alone, if they are detected early enough. The problem is that by the time we see the animal, the condition is often advanced and more difficult to treat.

- Home care can be a **less costly** alternative to hospital.
- With **continuous** home care, there is more one-on-one supervision, which can help **prevent and reduce falls**, unsafe wandering, and other negative situations from occurring (**early warning**).

## What is a Urinalysis?

Remember to  
do urinalysis

Urinalysis is a simple test that assesses the physical and chemical composition of urine. Abnormal results usually indicate that there is a problem with the **kidneys and/or urinary system**. However, a urinalysis can also provide clues about problems in other organ systems, or may indicate the presence of a metabolic disease, such as diabetes mellitus. **Urinalysis is necessary for a complete assessment** of the kidneys and urinary system, and should be included in any thorough evaluation of a pet's health status.

# Petgeia (Pet Health Testing Kit)

10 biomarkers for common diseases like UTI, Urolithiasis, Cystitis, FLUTD
