PetBONE

Formulas for exclusive use in animal hospitals

Dedicated to providing special nutritional supplements exclusively for pets.

Preventive medicine

- Enhance the strength of oral alveolar bone and body bones early
- Extend the life of bone and teeth
- Strengthening bones, maintaining flexibility, and slowing aging

Postoperative medicine

- Increase osteoblast, accelerate recovery, and shorten treatment
- Dental bone, bones, joints, triple recovery treatment effect
- Reducing pain and improving mobility

all-round

Application objects : Dogs and cats of all ages

Applicable to osteoarthritis, due to the factors like the lack of nutrition of bones, aging, obesity, congenital genetic defects, injury, and the lack of nutrition, factors like these causing damage to the bones and cartilage, friction on the hard bones, loss of joint support and reducing cushioning flexibility, which can lead to injury to the pet.

Help dogs and cats make early lifestyle adjustments and supplement their diet to slow down joint aging!

Joint Bone

PetBONE

- Proved by a variety of human subjects and animal tests, our exclusive material, **【Strontium Citrate】**, has actual benefits for bone, and articular cartilage.
- With a new formula to help lubricate your pet's joints, provide nutritional supplements for bones, increase bone mobility, maintain stable and healthy joints, and lead a healthier life.

Exclusive formula for joints and bones

Strontium Citrate

Promotes the generation of osteoblasts, bone regeneration, and calcium absorption, and reduces the loss of bone and the loss of cartilage tissue.

MSM

A rich sulfur compound, it benefits reducing uncomfortable feelings. It can maintain and helps provide comfort for pets' mobility.

B.C. Kolla2®

As the main ingredient of joint cartilage, it can maintain the complete structure of the protein, enhances mobility, and makes the pets more flexible.

Vit-C

Maintenances joint capsule, lubricating fluid, cartilage, and other connective tissues. Promotes collagen absorption and synthesis.

Actual cases used by veterinarian

British Shorthair 3y

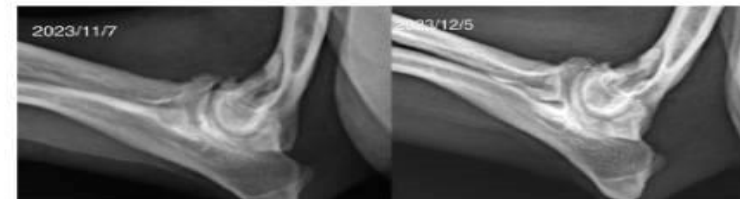

Before

After
